ACKNOWLEDGEMENTS

"This is only what, may I hold true,
the mystery of my love for you, the wonders of your love to me."

I thank the Providence, for bestowing upon me, the opportunity to engage myself in research and I am sure that the almighty would guide my intellect which would enable me to make meaningful contributions to science. I thank my parents who have groomed me with utmost love and care and prepared me to face the challenges of life. Their constant love, support and blessings are the guiding forces that help me to make every pleasant and unpleasant experience a learning experience and move ahead.

This thesis work is a result of generous help from a number of people, without whose guidance and support it would have almost been impossible to complete it. While I am trying to recollect and put the names together, it may be possible to miss some names and I would like to apologize to them in advance. Whenever they see this thesis, they should scratch their head and remember that they have been a part of this process.

I express my sincere gratitude towards my guide, Dr. Balaram Ghosh, for his continuous guidance and support throughout my Ph.D. program. Under his able leadership, there has been no paucity of resources and ideas. He is very approachable and spends a lot of time with his students in scientific discussions that ensure tackling difficult problems with ease.

I would like to thank Dr Anurag Agrawal for his continuous guidance and support, both with his brilliant ideas and resources. I would always remember the brainstorming sessions with him, which made seemingly difficult concepts, easy to grasp.

I must acknowledge Dr. Indranil Mukhopadhyay (ISI, Kolkata) for his immense help and support in the data analysis. He has excellent teaching abilities and that helped me to think through the data in order to devise appropriate statistical methods for the analysis.

I am thankful to Professor Samir K. Brahmachari (formerly director of this institute and currently the Director General of CSIR) for
creating a very conducive environment of research in this organization. I must also thank Dr. Rajesh Gokhale, our current director, for his tireless efforts, in ensuring a world class facility for genomics research at this institute and for allowing me to work here. I am grateful to Dr. R.H. Das and Dr. Y Singh for their help and support during the course of my Ph.D. Their comments and suggestions were very valuable in devising appropriate strategies for solving the scientific problem whenever encountered. I sincerely thank Dr. Mitali Mukherji, for allowing me to use her lab facilities. The help extended by Dr V.P. Singh in my animal experiments is duly acknowledged.

I am extremely indebted to the CSIR for providing me the scholarship and all other financial support during my PhD. It is an extreme pleasure to be a part of the prestigious University of Pune and I thank the University for the PhD registration.

My journey in this lab began as a Medical Social Worker, endowed with the responsibility to collect samples for the genetic studies. I must mention, this was an arduous job which required a lot of patience. I feel a deep sense of gratitude towards the volunteers who have participated in the studies. The help of the clinical collaborators in this regard is greatly acknowledged. I also enjoyed the great company of Dr. U. Mabalirajan during the sample collection tours. I must appreciate the help extended by Bharat, Satish and Nahid during the sample collection expeditions.

I would like to thank all my seniors, Rana, Mamta, Shilpy, Sarvesh, Rajan, Jyotsna, Rajshekhar, Sakshi, who have been extremely supportive throughout. I enjoyed the jovial company of my labmates, Rengarajan, Ranjana, Sanober, Deepti, Abha, Amit, Tej, Vandana, Balaji, Reenu, Kamiya, Jyotirmoi, Pooja, Atoshi, Reema, Manish, Neha, Nomes, Tanveer, Lokesh, Anirban, Ankur, Suchita, Veda, Nisha and Vinie. I would especially like to thank Sudipta, for all the help provided by her during my experiments. Particularly, her help during the Golden Gate Assay ensured its successful completion. I also had the great company of Arul Joseph, especially in the animal experiments. I admire Arul for his genuine research interest which will take him a long way. I would like to thank Anirban and Rituparna for their help in reviewing the thesis.

I must thank Tavpritesh for his help in the data analysis. Mr. Raghu and Ashish from the IT department were extremely helpful in my
data analysis on the clusters/parallel computers. I also enjoyed the great company of Komal, Samira, Jitendra, Jinny, Rupali, Pragya, Prashant, Aradhita, Rajesh, Preeti, Farhan, Sudheer, Pankaj, Priyanka, Shivani, Faruq, Iklakh and Gaurav during my PhD.

I would like to thank the system administrators, library staff and administrative staff of IGIB for their cooperation.

During the course of PhD, there are a number of testing situations that require help, support and guidance from trusted aides. I am lucky to have, by my side, some enduring relationships that provide unconditional moral support. My friend Manu has been one such companion, who has stood by me in the hour of need and crisis. I have also tested and brought the very caring side of some of my friends like Amit, Vivek, Arijit, Jinny, Sonia, Sandeep, and Beena. I also have very memorable moments with Kunal/Mani babu, Rashmi, Garima, Jyoti, Joshua, Gurbind and Kanishka.

My brother Madhvendra and sisters Sarita/Pinky and Supriya/Guria have been unlimited sources of love, affection and care. The very thought of my niece Khushi, fills my heart and soul with joy and relaxes my nerves. The moral and motivational support that has been provided to me by my brother-in-law Sunil has definitely made my journey smooth. I am privileged to have the company of my brother-in-law (Saale sahab), Amit “Bhaiya” in the journey of my life. The love and support of the other members of my extended family add extra sense of security and fulfillment in me.

It fills my heart with love, pride and gratitude to mention the unconditional moral and motivational support provided to me by mother-in-law. Her presence in my life has ensured extra sense of security that encourages me to take greater risks in life without bothering too much about failures. It is because of her that I have a very loving, caring, supportive and adorable wife, Vijaya. My wife has given entirely new meaning to my life. I am sure that in her company, my personal and professional growth would be accelerated.

Amrendra Kumar
