Acknowledgment

This thesis arose in part out of years of research that has been done since I first came into the folds of IGIB family. In the course of my long journey, I have worked with a great number of people whose contribution in assorted ways to the research and the making of this thesis deserves special mention. It is a pleasure to convey my gratitude to them all in my humble acknowledgment.

In the first place I would like to record my gratitude to my supervisor, Dr. Naveen Arora, for his advice and guidance from the very early stage of this research as well as for giving me extraordinary experiences throughout the work. Above all, he provided me unflinching encouragement and support in various ways. His truly scientific intuition has made him a constant oasis of ideas and passions in science, which exceptionally inspired and enriched my growth as a student and a researcher. For this, I am truly indebted to him.

I gratefully acknowledge my co-supervisor, Dr. Banu Pratap Singh, for his advice, supervision, and crucial contribution, which made him a backbone of this research and thesis. His involvement with his originality has triggered and nourished my intellectual maturity that I will benefit from, for a long time to come. I am grateful in every possible way and hope to keep up our collaboration in the future.

Many thanks go in particular to Dr. Susheela Sridhara. Her lively nature and constructive ideas helped me in fulfillment of my work. Thank you very much madam, for all you have done for me. I am much indebted to Dr. Lalita for her valuable advice in scientific discussions, supervision in synchrotron and furthermore, using her precious times to read the thesis. I have also benefited by advice and guidance from Dr. (Mrs.) Krishna Mishra who also always kindly granted me her time even for answering some of my unintelligent questions about beam lines and synchrotron.

I am grateful to Prof. Samir K Brahmacari, DG, CSIR, Dr. K.C. Gupta, ex-acting Director and Dr. Rajesh S. Gokhale, Director, Institute of Genomics and Integrative Biology, Delhi for providing excellent research facilities. I also greatly acknowledge the scientific suggestions and encouragement provided by Dr. A. B. Singh, Dr. Y. Singh, Dr. B. Ghosh, Dr. V.C. Kalia, Dr. G. L. Sharma and Dr. T. Madan.
Many thanks go to Neetu, Amit, Sudha and Vidhu for scientific discussions and the pleasure of working together as a group. I also thank Shraddha and Garima for their help in performing experiments during their training under my supervision. I owe my special thanks to Dr. Azim who first taught me how to work. I am proud to record that I had several opportunities to work with an exceptionally experienced researcher like him.

I wish to acknowledge Vinay, Jitendra, Divya, Anand, Surendra and Saurabh for their constant support and encouragement. They always helped in bringing out the best in me through discussions and valuable suggestions. Their help in trouble shooting my experiments is highly appreciated. Heartly thanks to Abhinav and Neelu for their advice and their willingness to share their bright thoughts with me, which were very fruitful for shaping up my ideas and research.

My special thanks are due to Ankur, Jayshankar, Deepshika, Dolly and Anamika for their warm support that enabled me to complete this thesis. I would like to thank my juniors Dhanpal, Smitha, Mukesh, Subojit, Shipra, Rahul, Pandyan, Prerna, Ankita, Sanjay, Sagar and Chhavi for providing a lively environment in the lab.

Thanks to Mudit, Abhinav, Amit, Kshtij, Gunjan and Santosh for creating such a great friendship in the institute, and many places in between for sharing various thoughts especially during the “tea break” in the late afternoons and evenings.

I also acknowledge Neelkamal, Lakshana, Poonam, JataShankar, Vibha, Jyotsna, Bharat, Seema, Manish, Ram, Ehtesham, Manoj, Dr. Azim, Rashmi, Shipra, Ramkrashan, Chandini, Raj, Azeet, Gyan, Preeti, Richa, Saurabh, Manas, Pallav, Rajan, Amit, Amrendra, Sakshi, G.P. Singh, Kishan, Mahesh, Iswar, Snehlata, Atul, Dilip, Soma, and Archana for their advice and their willingness to share their bright thoughts with me, which were very fruitful in shaping up my ideas and research.

I convey special acknowledgement to ‘European Academy of Allergy and Clinical Immunology’ and ‘American Academy of Allergy Asthma and Immunology’ for their indispensable help in dealing with travel funds, administration and bureaucratic matters during my visit to France and U.S. So, I could optimally carry out my research and travels. I sincerely acknowledge the financial support from Central Scientific & Industrial Research (CSIR), Govt. of India, New Delhi, throughout the period of research.
My parents and in-laws deserve special mention for their constant support and prayers. My Father, Shri Vashith Muni Tripathi had nurtured my learning character and showed me the joy of intellectual pursuit ever since my childhood. My Mother, Smt. Chandna is the one who sincerely raised me with her caring and gentle love. Pratima and Pragya thanks for being supportive and caring siblings. This special opportunity also witnesses my heartfelt thanks to my brother-in-law Kaushledra Upadhyay, whose optimism was inspirational and humor was lively. Without their love, encouragement and understanding it would have been impossible for me to finish this work.

This journey was destined to be exciting with my wife Sapna, as life becomes easier when you get a great friend as your life partner. Words fail me to express my appreciation for her whose dedication, love and persistent confidence in me, has taken the load off my shoulder. I owe her for being unselfishly let her intelligence, passions, and ambitions collide with mine. She has me bursting into laughter by her instant remarks over the most serious issues. Her unwavering love, affection, support and confidence in me helped me to be a better person. She has always been a ready help at discussion of my work and her constructive criticism in my research work is highly appreciated. She has refreshed that radiant confidence in me whenever I was shaky about my proceedings. Thanks dear for the way you have touched my life.

Last but not the least, there are no words to thank Almighty God who made it all possible. Finally, I would like to thank everybody who was important to the successful realization of thesis, as well as expressing my apology that I could not personally mention everyone.

Prabhanshu Tripathi
