Acknowledgements

Through the course of this research, a number of people have contributed to and helped in various ways. This doctoral work has taught me a whole lot of invaluable lessons which though not a part of this thesis will continue to guide me throughout my life. This work would be incomplete without acknowledging various people associated with my work, their efforts and contributions.

Firstly, I would like to whole-heartedly thank my research supervisor, Associate Professor Lalit N. Wankhade, for his guidance, invaluable help, ideas and patience. Our often-held and long drawn discussions of various minute aspects of the problem helped me better understand the problem and associated intricacies. I really appreciate Dr. Wankhade for his patience during these at times frustrating discussions. I have absorbed a number of imitable qualities from Dr. Wankhade including the ability to analyze, scrutinize and critique both self written works as well as those of other researchers, to persevere to solve a tough problem. I hope to follow these qualities in my professional career. I am grateful to Dr. Y. V. Joshi, Director SGGSIE&T, Vishnupuri, Nanded, Dr. L. M. Waghmare, former Director SGGSIE&T, Vishnupuri, Nanded, Dr. M. K. Rodge, Head of Mechanical Engineering Department, Dr. J. V. L. Venkatesh, and Dr. M. B. Kokare, Dean (R&D), for their constant encouragements and motivational support.

I express my thankfulness to the faculty members of SGGS Institute of Engineering & Technology, Nanded, namely, Dr. B. M. Dabade, Dr. V. M. Nandedkar, Dr. V. B. Tungikar, Prof. R. P. Parvekar and Prof. N. M. Khandre for their interactions and unfailing inspirations that explored my knowledge. Thanks to all other teaching and non-teaching staff members of the department for their timely help. I would like to thank my friends and colleagues at SGGS Institute of Engineering & Technology for their help and support during the research work.

I would like to acknowledge my sincere gratitude to Dr. V. S. Pawar (Secretary and Principal, Gramin college of engineering, Nanded), and all the members of management committee of Gramin Shikshan Prasarak Mandal for their valuable support and motivation for accomplishment of the research work.
Maulana Azad National Research Fellowship has made this research possible. I would like to thank the Government of India for their kindness, not only to me, but also to all other students who have been funded by the Government.

I would like to thank my friends and colleagues namely Tushar Narlawar, A. M. Shirse, P. Z. Vyavahare, S. S. Kulkarni, Suyash Mane, Dr. V. C. Jamdade, B. G. Ghose, A. P. Gacche, S. A. Kadam, M. M. Bharti, and Dr. N. V. Alandakar for their kindness and moral support during the research work.

I express my gratitude to all managers/owners, and employees of the concerned organizations for extending their co-operation and sharing data. I would like to express my thanks to all people who had helped me during my research work. I would like to extend my earnest gratitude to the proprietor S. S. Kamble and employees of S. S. Industries, Dharwad, Karnataka, for their wholehearted support and cooperation.

I acknowledge the efforts of my mother and five sisters who always stood by me during the good times and most importantly during the not so good times. I am forever indebted to them for their love and support throughout my professional and personal academic career.

Last but certainly not least, I would like to thank my wife, Jyoti and our sons Shashwat and Sanyyam for their endless love and emotional support throughout the work of this thesis in spite of the fact that they missed me considerably and shared the immense burden of my transformation of the Ph.D. process.

At last, I would like to thank all my teachers at various levels of my education, from whom I have gained more than just academic knowledge.

Raju Sheshrao Kamble
April - 2018, Nanded, India.
