

## Index of Figures

Figure No.	Title	Page No.
1	Flow diagram of a HPLC system	23
2	Chemical structure of hypericin	75
3	Chemical structure of khellin	79
4	Structures of vincristine (A), vinblastine (B)	83
5	Structures of (a) podophyllotoxin, (b) etoposide	88
6	Structures of strychnine (a), brucine (b)	93
7	HPLC chromatogram of hypericin standard ( $40 \mu\text{g mL}^{-1}$ ) at 590 nm	98
8	HPLC chromatogram of <i>H. perforatum</i> extract containing hypericin at 590 nm	98
9	Overlay UV spectra of hypericin standard and hypericin in extract at 590 nm	101
10	HPLC chromatogram of khellin standard ( $40 \mu\text{g mL}^{-1}$ ) at 247 nm	103
11	HPLC chromatogram of <i>A. visnaga</i> extract containing khellin at 247 nm	103
12	Overlay UV spectra of khellin standard and khellin in extract at 247 nm	107
13	HPTLC chromatogram of vincristine standard ( $4.0 \mu\text{g mL}^{-1}$ ) at 307nm	110
14	HPTLC chromatogram of vinblastine standard ( $4.0 \mu\text{g mL}^{-1}$ ) at 225 nm	111
15	HPTLC chromatogram of <i>Catharanthus roseus</i> extract containing vincristine	112
16	HPTLC chromatogram of <i>Catharanthus roseus</i> extract containing vinblastine	113
17	Overlay UV spectra of vincristine standard and vincristine in extract at 307 nm	118
18	Overlay UV spectra of vinblastine standard and vinblastine in extract at 225 nm	118
19	HPTLC chromatogram of podophyllotoxin standard ( $2.4 \mu\text{g mL}^{-1}$ ) at 292 nm	122
20	HPTLC chromatogram of etoposide standard ( $2.0 \mu\text{g mL}^{-1}$ ) at 292 nm	123
21	HPTLC chromatogram of <i>Podophyllotoxin hexandrum</i> extract containing podophyllotoxin at 292 nm	124
22	HPTLC chromatogram of etoposide formulation containing etoposide at 292 nm	125
23	Overlay UV spectra of podophyllotoxin standard and podophyllotoxin in extract at 292 nm	130
24	Overlay UV spectra of etoposide standard and etoposide in formulation at 292nm	131
25	HPTLC chromatogram of strychnine standard ( $500 \mu\text{g mL}^{-1}$ ) at 259 nm	134
26	HPTLC chromatogram of brucine standard ( $500 \mu\text{g mL}^{-1}$ ) at 306 nm	135
27	HPTLC chromatogram of <i>S. nux-vomica</i> extract containing strychnine and brucine	135
28	Overlay UV spectra of strychnine standard and strychnine in extract at 259 nm	140
29	Overlay UV spectra of brucine standard and brucine in extract at 306 nm	141

## Index of Tables

Table No.	Title	Page No.
1	Validation parameters of the proposed HPLC method for estimation of hypericin	99
2	Intermediate precision of the proposed HPLC method of hypericin	99
3	Robustness of the proposed HPLC method of hypericin	100
4	Accuracy as recovery of the proposed HPLC method of hypericin	102
5	Validation data for khellin	104
6	Intermediate precision data for khellin	105
7	Robustness data for khellin	106
8	Recovery data for khellin	108
9	Validation parameters of the proposed HPTLC method for estimation of vincristine and vinblastine	114
10	Intermediate precision data of proposed HPTLC method of a) vincristine and b) vinblastine	115
11	Robustness data of proposed HPTLC method of a) vincristine and b) vinblastine	116
12	Accuracy as recovery data of proposed HPTLC method of a) vincristine b) vinblastine	119
13	Validation parameters of the proposed HPTLC method for estimation of podophyllotoxin and etoposide	126
14	Intermediate precision data of proposed HPTLC method of a) podophyllotoxin and b) etoposide	126
15	Robustness data of proposed HPTLC method of a) podophyllotoxin and b) etoposide	128
16	Accuracy as recovery data of proposed HPTLC method of a) podophyllotoxin b) etoposide	132
17	Validation parameters of the proposed HPTLC method for estimation of strychnine and brucine	136
18	Intermediate precision data of proposed HPTLC method of a) strychnine and b) brucine	137
19	Robustness data of proposed HPTLC method of a) strychnine and b) brucine	138
20	Accuracy as recovery data of proposed HPTLC method of a) strychnine b) brucine	142
21	List of Chemicals/Reagents	73
22	List of instruments	74
