Acknowledgement

This thesis arose in part out of years of research that has been done. I have worked with good number of people whose contribution in assorted ways to the research and the making of the thesis deserved special mention. It is a pleasure to convey my gratitude to them all in my humble acknowledgement. First of all, in all humility, I offer my humble thanks to Almighty god for providing me strength and determination in completing this rigorous task.

Not as a mere formality but with all humility and full reverence at my command, I take this opportunity to record my gratitude to highly esteemed and worthy guide Prof. Bharat Singh, professor and former Head, Department of Chemistry, University of Allahabad. It is only on account of his ever-willing help, untiring erudite guidance, parental care, stimulating criticism, deep personal interest and attention that this thesis is in the present form and shortcomings, if any in it, are my own. His scientific approach and critical suggestions have been extremely valuable during the entire period of my research work. I am also thankful to respected Mrs. Maya Singh for her caring and affectionate nature towards me.

I express my sincere thanks to Prof. Jagdamba Singh, Head, Department of chemistry, University of Allahabad for providing me all the necessary laboratory and library facilities for research work in the department.

I owe a special gratitude to Prof. A.K. Singh for his encouraging support, invaluable suggestions and help throughout the course of my research which helped me to a considerable extent in achieving my aim.
Since parent’s blessings are initial and essential, I am no exception to it. I wish to express my deep sense of gratitude to my parents (Shri Shijju Mishra & Smt. Uma Mishra), brothers, my in-laws and all family members for their encouraging support from time to time during the course of my research work. My reverential gratitude goes to my Uncle Mr. Rajendra Mishra and Aunty Mrs. Shivani Mishra who have always inspired me by continuously enthusing their high moral values in my life for which I have no words to express properly.

I cannot forget my duty to express my indebtedness to all my teachers who have contributed to build up my academic career.

I am grateful to my seniors Dr. Deepmala Gupta, Dr. Jagat Narayan Singh, Dr. Aniruddh Kumar Singh and Dr. Anamika singh Singh who from time to time helped me during my entire research work. I wish to thank Mrs.Shipra Tripathi for his unfathomable help extended to me in various ways at every juncture of my research work. I am also very thankful to my colleagues, Vijay Shankar Pandey, Shiv kumar Verma, Brij Kishore, Ravindra Kumar Gautam, Sita and Sudhir kumar Dwivedi and, a word of thanks to all those who directly or indirectly helped me throughout the tenure of investigation.

Finally I gratefully acknowledge the University Grants Commission, New Delhi, for financial support.
