# INDEX

1. **CHAPTER I:**
   **INTRODUCTION**  
   01-10

2. **CHAPTER II:**
   **In-Vitro PROPAGATION OF Costus pictus D.Don**  
   11-31
   
   2.1 : **INTRODUCTION**  
   11-19
   
   2.1.1 : Plant Tissue Culture  
   13
   
   2.1.1a : The Culture Environment  
   15
   
   2.1.1b : Plant Growth Regulators  
   15
   
   2.1.1c : Culture Types  
   17
   
   2.1.1d : Advantages of Plant Tissue Culture  
   18
   
   2.1.2 : The Present Study  
   19
   
   2.2 : **MATERIALS AND METHODS**  
   20-29
   
   2.2.1 : Study Design for Shoots and Roots Initiation  
   20
   
   2.2.1a : Stage 1  
   20
   
   2.2.1b : Stage 2  
   26
   
   2.2.1c : Stage 3  
   26
   
   2.2.1d : Stage 4  
   27
   
   2.2.2 : Callus Initiation  
   27
   
   2.3 : **RESULTS AND DISCUSSIONS**  
   30-31

3. **CHAPTER III:**
   **ISOLATION AND STUDY OF PHYTOCONSTITUENTS**  
   32-79
   
   3.1 : **INTRODUCTION**  
   32-39
   
   3.2 : **MATERIALS AND METHODS**  
   39-76
   
   3.2.1 : Extraction of Secondary Metabolites  
   40
   
   3.2.1a : Technique for Extraction  
   41
   
   3.2.2 : Finger Printing With Respect To  
   Four Groups of Secondary Metabolites  
   43
3.2.3: Isolation and Analysis of Fractions 63
   3.2.3a: Isolation of Fractions 63
   3.2.3b: Collection of Fractions 64
   3.2.3c: Analysis of Fractions with FTIR Technique 66

3.3: RESULTS AND DISCUSSIONS 77-79

4. CHAPTER IV:
   In-Vivo ACUTE TOXICITY STUDY 80-94
   4.1: INTRODUCTION 80-83
   4.2: MATERIALS AND METHODS 83-91
      4.2.1: Study Protocol for Toxicity Testing 84
         4.2.1a: Selection of Animals 84
         4.2.1b: Preparation of Animals 85
      4.2.2: Dose Groups 85
      4.2.3: Preparation of Doses 86
      4.2.4: Administration of Doses 87
      4.2.5: Observations of Animals 87
   4.3: RESULTS AND DISCUSSIONS 92-94

5. CHAPTER V:
   In-Vivo EFFICACY STUDY FOR ANTI-DIABETIC ACTIVITY 95-136
   5.1: INTRODUCTION 95-99
      5.1.1: Efficacy Testing of Drug 98
   5.2: MATERIALS AND METHODS 100-109
      5.2.1: Study Protocol for Efficacy Testing 100
         5.2.1a: Selection of Animals 101
         5.2.1b: Preparation of Animals 101
      5.2.2: Inducing Diabetes 102
         5.2.2a: Preparation of Citrate Buffer as Solvent for Streptozotocin 103
         5.2.2b: Collection of Blood 104
         5.2.2c: Testing Diabetes 104
5.2.3: Dose Groups
  5.2.3a: Test substances for Dosing
  5.2.3b: Preparation of Daily Doses
  5.2.3c: Administration of Doses

5.2.4: Daily Observations

5.2.5: Protocol for Blood Biochemistry

5.2.6: On terminal day of the Study

5.3: RESULTS AND DISCUSSIONS

  5.3.1: Analysis of Physical Parameters
    5.3.1a Body Weights of Animals
    5.3.1b Water Consumption by Animals
    5.3.1c Food consumption by Animals

  5.3.2: Analysis of Pathophysiology and Blood Biochemical Parameters
    5.3.2a Blood Sugar
    5.3.2b Cholesterol and Triglycerides
    5.3.2c Albumin, Globulins, Total Proteins and Blood Urea
    5.3.2d AST and ALT
    5.3.2d Amylase

  5.3.3: Toxicity and Mortality

  5.3.4: Observation of Excised Organs

6. CHAPTER VI:
   RESULTS AND DISCUSSIONS

   BIBLIOGRAPHY

   SYNOPSIS
