Acknowledgement

Though my name is alone on the front cover of this thesis, I am by no means its sole contributor, rather there are a number of people behind this piece of work to whom I am grateful and they deserve to be both acknowledged and thanked for their valuable contributions.

First and foremost, I would like to express my sincere gratitude, respect and indebtedness to my supervisor, Dr. Banalata Mohanty, for the continuous support of my D. Phil. study and related research, for her patience, motivation and immense knowledge. Her guidance helped me in all the time of research and writing of this thesis. I could not have imagined having a better advisor and mentor for my D. Phil. study.

Besides my supervisor, I would like to thank the rest of my thesis committee: Prof. R. S. Pandey and Prof. R. R. Tiwari, for their insightful comments and encouragement. My sincere thanks also go to Prof. S. K. Malhotra, Head, Department of Zoology, University of Allahabad, as well as Profs. S. D. Dixit, M. A. Tiwari and V. Krishna, ex-Heads of the Department of Zoology, for providing me necessary facilities who gave access to the laboratory and research facilities during my research work. Without their precious support it would not be possible to conduct this research. I also thank to rest of the professors of the department for their valuable support during the period of my research project.

I am obliged to the University Grant Commission, New Delhi, India, which provided me funds partly and supported this research work.

I am especially thankful to our laboratory collaborator Prof. Kazuyoshi Tsutsui, Department of Biology, University of Waseda, Japan for providing me neuropeptides and antibodies through my supervisor. I am also very thankful to Dr. Rohit Mishra and Prof. Anupam Dixit, Department of Botany, University of Allahabad, to help me during ELISA execution.
I sincerely thank my senior fellows Dr. Brijesh K. Mishra, Dr. Akash C. Mishra, Dr. Ashish K. Mishra, Dr. Ruchna Verma, Mr. Rakesh Bhaskar and Mr. Umesh Mehra for their immense motivation, technical supports and stimulating discussions during the experiments and thesis writing. I am also grateful to my colleagues Miss. Shamael Aamir and Mr. Saurabh Kumar Singh as well as juniors Miss. Preeti Gupta and Miss. Farhad Bano for their kind cooperation during the execution of experiments.

Also, I am grateful to thank my friends Mr. Swapnil Pandey, Mr. Amit Kumar Saxena, Mr. Arun Tiwari and Er. Ankit Tripathi for spiritually enlightening me the first glance of research.

Last but never the least, I am always debtful to my beloved father Sri Nand Gopal Pandey and mother Smt. Kamla Pandey, for their love and encouragement throughout writing my D. Phil. Research. I would like to thank my family most cordially: my brothers Mr. Ravindra Nath Pandey and Mr. Aditya Pandey and sister Mrs. Suman Tiwari for motivating me spiritually. None of this would have been possible without the love and patience of my family.

Words fail to express my special thanks to my wife Mrs. Mamta Pandey for her everlasting support and unconditional help in all the ways.

(Surya Prakash Pandey)
