Acknowledgement

This thesis arose in part out of years of research work that has been done since I came to Shivaji University. By that time, I have worked with a great number of people whose contribution in assorted ways to the research and the making of the thesis deserved special mention. It is a pleasure to convey my gratitude to them all in my humble acknowledgment.

First and foremost I would like to record my gratitude to my advisor Dr. R. K Kamat for his supervision, advice and guidance from very early stage of this research as well as giving me extraordinary experience throughout the work. His truly scientist intuition has made him as a constant oasis of ideas and passions in electronics, which exceptionally inspire and enrich my growth as a student, a researcher want to be. I am indebted to him more than he knows.

Prof. Dr. M. D. Uplane, the Head of Electronics Department at the Shivaji University and Dr. P. N. Vasambekar at the Shivaji University have been my teachers since my course of M. Sc. They offer advice and suggestions whenever I need them. Besides, they have set a role model of a typical Indian teacher who cares and loves their students as if they were their own kids. Thanks Prof. Uplane and Dr. Vasambekar.

I have also benefited by advice and guidance from our former Head of the Department, Prof. S R. Sawant who also always kindly grants me his time when I started my research work in the early stage.

Furthermore, Dr. R. R. Mudholkar and Dr. P. A. Kadam have always been a constant source of encouragement during my graduate study as well research work. I admire the persistent and meticulous attitude of Dr. R. R. Mudholakar. Despite his hectic schedule as a Lecturer, Dr. P. A. Kadam is always available to chat with me and cheer me up.

I gratefully acknowledge Dr. Santosh Shinde for his support and crucial contribution, which made him a backbone of this research and so to this
thesis. His involvement with his originality has triggered and encourages me. Santosh, I am grateful in every possible way and hope to keep up our collaboration in the future.

I would also like to thank Dr. J. S. Parab, Goa University for his encouragement throughout the work.

Collective and individual acknowledgments are also owed to my colleagues at Sanjeevan whose present somehow perpetually refreshed, helpful, and memorable. Many thanks go in particular to Sanjay Jadhav, Amit Kalyankar, Shailendra Patil and Anuja Kulakarni for giving me such a pleasant time when working together with them since I knew them in Sanjeevan.

Where would I be without my family? My parents deserve special mention for their inseparable support and prayers. My mother, in the first place is the person who put the fundament my learning character, showing me the joy of intellectual pursuit ever since I was a child one who sincerely raised me with her caring and gently love.

Words fail me to express my appreciation to my wife Sujata whose dedication, love and persistent confidence in me, has taken the load off my shoulder. I owe her for being unselfishly let her intelligence, passions, and ambitions collide with mine.

Finally, I would like to thank everybody who was important to the successful realization of thesis, as well as expressing my apology that I could not mention personally one by one.

Vinod G. Shelake
Shivaji University, Kolhapur
June 2011.
