Acknowledgement

Encouragement motivates a person towards his aim, while guidance helps him to achieve it. Both encouragement and guidance take a person towards success in his work. A moment comes which comes but rarely in a student’s life, when with utmost pleasure and satisfaction. I myself, Neeti Sharma, submit my thesis on “Biochemical Basis of Fusarium Resistance in Eruca sativa Cultivars in Rajasthan”.

I am extremely thankful to the God for giving me this opportunity to cherish my childhood dream of becoming a researcher. I express my kindest regards to respected Dada, Late Prof. Diwakar Shastri, Prof. Chitra Purohit (President) Banasthali University for their graceful blessings at every step without which nothing could have been possible. I am thankful to our esteemed Prof. Aditya Shastri (Vice Chancellor) for his excellent support and providing me with an encouraging work environment and for always emphasizing on quality work.

It is with utmost regards and sincerity that I take this opportunity to thank Prof. Vinay Sharma, Dean, Faculty of Science and Technology & Head, Department of Bioscience and Biotechnology for giving me an opportunity to work in this department of the university and making the facilities available for carrying out research.

I am extremely grateful to my research guide, Dr. Jyoti Srivastava, Associate Professor, Department of Biosciences and Biotechnology, for her valuable guidance, scholarly inputs and consistent encouragement. I received throughout the research work. This feat was possible only because of the immense support provided by Ma’am. A person with an amicable and positive disposition, Ma’am has always made her available to clarify my doubts despite her busy schedules. Her wide knowledge and her logical way of thinking have been of great value to me. Her understanding, encouragement and personal guidance have provided me with a good basis for the present thesis. I consider it as a great opportunity to do my doctoral
programme under her guidance and to learn from her research expertise. Thank you, Ma’am for all your help and support.

With my overwhelming sense of pride and gratitude, I extend my sincere thanks to Dr. B. D. Pant, Emeritus Scientist, Ex-Chief Scientist and Head, MEMS and Microsensors Group, C.E.E.R.I, Pilani, Rajasthan, my Co-supervisor, who guided me throughout this research work. I am grateful to him for introducing me to the Micro-world of MEMS devices and technology. I am further grateful to him for his highly knowledgeable guidance, constructive appreciation and instructions that helped me during this entire tenure of six years of my research. Some faculty members of the Institute have been very kind enough to extend their help at various phases of this research, whenever I approached them, and I do hereby acknowledge all of them.

I would like to thank the Department of Bioscience and Biotechnology as a whole for their technical, academic, and financial support. I am thankful to the entire office and Bioinformatics staff for extending their cooperation during this work. I thank all my fellow research Lab mates: Swati Agarwal, Anumegha, Shaili Yadav, Preeti Chauhan and Apoorva for stimulating discussions on different aspects of science, their love and ceaseless encouragement in this work. I find the words inadequate to express my feelings for their lovable support which I received from my sweet close friend Mrs. Ashima Wadhawan for their co-operations; for their moral support when my morale ebbed.I would like to give special thanks to my friend Dr. Sandhya Sharma, for their valuable suggestions.

I own my deep sense of gratitude to my beloved parents Dr. Sunil Kumar Sharma, Dr. Anita Sharma, who encouraged and helped me at every stage of my personal and academic life, and longed to see this achievement come true. Their life and teaching have always been a source of inspiration to me in the journey of my life, which has no destination. I also thank my brother Dr. Nitin Sharma and their families for their good wishes. My brother who helped me in various ways with their immense support and affection during course of my work and always being there for me.
It is my pleasure to thank my in-laws for their constant support. I have no words to thank my father in-law Late Dr. Ravi Dutt Sharma and my mother in-law Smt. Kusum Lata Sharma, without their encouragement and understanding it would have been impossible for me to finish this work. I also thank to my uncle & aunty-in-laws Dr. Rajesh Sharma & Dr. Mamta Sharma, sisters-in-laws and their families for their motivation, absolute love, blessings and guidance.

Words fail to express my appreciation to my loving husband Sh. Pratyush Sharma. He forms the backbone and origin of my happiness. His understanding, support and love has enabled me to complete this thesis.

Date: (Neeti Sharma)
