# CONTENTS

## INTRODUCTION

## OBJECTIVES OF THE PRESENT STUDY

## LITERATURE REVIEW

**Impact of Neonatal Hypoglycemia on the Brain**

**Brain Neurotransmitter changes during Neonatal Hypoglycemia**

**Dopaminergic system**

- **Dopamine Pathways**
- **Dopamine receptors and its subtypes**
- **Classification of Dopamine receptors**
- **Dopamine D1 like family**
- **Dopamine D2 like family**
- **Dopamine and its receptor alterations during Hypoglycemia**

**Signal Transduction by Dopaminergic activation**

**Second Messenger changes during Neonatal Hypoglycemia**

- **cAMP**
- **IP3**

**Signal transduction in Dopamine Neurotransmission**

- **PLC**
- **CREB**

**Glucose Transport across the blood brain barrier**

- **Glut 3**

**Neuronal Survival Factors**

- **GDNF**
- **BDNF**
- **NF-κB**

**Oxidative Stress and Neonatal Hypoglycemia**

- **SOD**
- **GPx**

**Neonatal Hypoglycemia and Apoptosis**

- **AKT-1**
- **TNF-α**
- **Bax**
- **Caspase-8**

**Current Treatments for Neonatal Hypoglycemia**

- **Bacopa monnieri**

**Bacoside A**

**Significance**
MATERIALS AND METHODS

Chemicals Used In The Study And Their Sources
Biochemicals
Radiochemicals
Molecular Biology Chemicals
Confocal Dyes
Animals
Plant Material
Preparation of Bacopa monnieri plant extracts
Preparation of Bacoside A
Experimental Design
Determination of anti-hypoglycemic potential of Bacopa monnieri & Bacoside A
Induction of Neonatal Hypoglycemia
Treatment
Determination of Body Weight
Determination of Blood Glucose
Sacrifice and tissue preparation
Dopamine D1 & D2 receptor binding studies using [3H] radioligands in the brain regions of control and experimental rats
   Dopamine D1 receptor binding studies using [3H] SCH 23390
   Dopamine D2 receptor binding studies using [3H] YM-09151-2
Protein Determination
Analysis of the receptor binding data
Linear regression analysis for Scatchard plots
Gene expression studies in different brain regions of control & experimental rats
   Preparation of RNA
   Isolation of RNA
   cDNA synthesis
   Real-time PCR assays
   cAMP content in the brain regions of control and experimental rats in vivo
      Principle of the assay
      Assay Protocol
   IP3 content in the brain regions of control and experimental rats in vivo
      Principle of the assay
      Assay Protocol
Dopamine D1, D2 expression studies in brain regions of control and experimental rats using confocal microscope
Statistics

RESULTS

Body weight of control and experimental rats
Blood glucose level of control and experimental rats

CEREBRAL CORTEX

Real Time amplification of dopamine D1 receptor mRNA in the cerebral cortex of control and experimental rats

Real Time amplification of dopamine D2 receptor mRNA in the cerebral cortex of control and experimental rats

Scatchard analysis of dopamine D1 receptor using [3H]SCH 23390 binding against SCH 23390 in the cerebral cortex of control and experimental rats

Scatchard analysis of dopamine D2 receptor using [3H]YM-09151-2 binding against sulpiride in the cerebral cortex of control and experimental rats

Confocal imaging of dopamine D1 receptor expression in the cerebral cortex of control and experimental rats

Confocal imaging of dopamine D2 receptor expression in the cerebral cortex of control and experimental rats

cAMP Content in the cerebral cortex of control and experimental rats

IP3 Content in the cerebral cortex of control and experimental rats

Real Time amplification of Phospholiase C mRNA in the cerebral cortex of control and experimental rats

Real Time amplification of CREB mRNA in the cerebral cortex of control and experimental rats

Real Time amplification of GLUT 3 mRNA in the cerebral cortex of control and experimental rats

Real Time amplification of Akt-1 mRNA in the cerebral cortex of control and experimental rats

Real Time amplification of TNF-α mRNA in the cerebral cortex of control and experimental rats

Real Time amplification of GDNF mRNA in the cerebral cortex of control and experimental rats
Real Time amplification of BDNF mRNA in the cerebral cortex of control and experimental rats 61
Real Time amplification of NF-κB mRNA in the cerebral cortex of control and experimental rats 62
Real Time amplification of SOD mRNA in the cerebral cortex of control and experimental rats 62
Real Time amplification of GPx mRNA in the cerebral cortex of control and experimental rats 62
Real Time amplification of Bax mRNA in the cerebral cortex of control and experimental rats 63
Real Time amplification of caspase-8 mRNA in the cerebral cortex of control and experimental rats 63
CORPUS STRIATUM
Real Time amplification of dopamine D1 receptor mRNA in the corpus striatum of control and experimental rats 65
Real Time amplification of dopamine D2 receptor mRNA in the corpus striatum of control and experimental rats 65
Scatchard analysis of dopamine D1 receptor using [3H] SCH 23390 binding against SCH 23390 in the corpus striatum of control and experimental rats 65
Scatchard analysis of dopamine D2 receptor using [3H] YM-09151-2 binding against sulpiride in the corpus striatum of control and experimental rats 66
Confocal imaging of dopamine D1 receptor expression in the corpus striatum of control and experimental rats 66
Confocal imaging of dopamine D2 receptor expression in the corpus striatum of control and experimental rats 66
cAMP Content in the corpus striatum of control and experimental Rats 66
IP3 Content in the corpus striatum of control and experimental Rats 67
Real Time amplification of Phospholiase C mRNA in the corpus striatum
of control and experimental rats

Real Time amplification of CREB mRNA in the corpus striatum of control and experimental rats

Real Time amplification of GLUT 3 mRNA in the corpus striatum of control and experimental rats

Real Time amplification of Akt-1 mRNA in the corpus striatum of control and experimental rats

Real Time amplification of TNF-α mRNA in the corpus striatum of control and experimental rats

Real Time amplification of GDNF mRNA in the corpus striatum of control and experimental rats

Real Time amplification of BDNF mRNA in the corpus striatum of control and experimental rats

Real Time amplification of NF-κB mRNA in the corpus striatum of control and experimental rats

Real Time amplification of SOD mRNA in the corpus striatum of control and experimental rats

Real Time amplification of GPx mRNA in the corpus striatum of control and experimental rats

Real Time amplification of Bax mRNA in the corpus striatum of control and experimental rats

Real Time amplification of caspase-8 mRNA in the corpus striatum of control and experimental rats

**CEREBELLUM**

Real Time amplification of dopamine D1 receptor mRNA in the cerebellum of control and experimental rats

Real Time amplification of dopamine D2 receptor mRNA in the cerebellum of control and experimental rats
Scatchard analysis of dopamine D1 receptor using [3H] SCH 23390 binding against SCH 23390 in the cerebellum of control and experimental rats

73

Scatchard analysis of dopamine D2 receptor using [3H] YM-09151-2 binding against sulpiride in the cerebellum of control and experimental rats

74

cAMP Content in the cerebellum of control and experimental Rats

74

IP3 Content in the cerebellum of control and experimental Rats

74

Real Time amplification of Phospholiase C mRNA in the cerebellum of control and experimental rats

75

Real Time amplification of CREB mRNA in the cerebellum of control and experimental rats

75

Real Time amplification of GLUT 3 mRNA in the cerebellum of control and experimental rats

75

Real Time amplification of Akt-1 mRNA in the cerebellum of control and experimental rats

76

Real Time amplification of TNF-α mRNA in the cerebellum of control and experimental rats

76

Real Time amplification of GDNF mRNA in the cerebellum of control and experimental rats

76

Real Time amplification of BDNF mRNA in the cerebellum of control and experimental rats

77

Real Time amplification of NF-κB mRNA in the cerebellum of control and experimental rats

77

Real Time amplification of SOD mRNA in the cerebellum of control and experimental rats

77

Real Time amplification of GPx mRNA in the cerebellum of control and experimental rats

78

Real Time amplification of Bax mRNA in the cerebellum of control and experimental rats

78
Real Time amplification of caspase-8 mRNA in the cerebellum of control and experimental rats

BRAIN STEM
Real Time amplification of dopamine D1 receptor mRNA in the brain stem of control and experimental rats
Real Time amplification of dopamine D2 receptor mRNA in the brain stem of control and experimental rats
Scatchard analysis of dopamine D1 receptor using [3H] SCH 23390 binding against SCH 23390 in the brain stem of control and experimental rats
Scatchard analysis of dopamine D2 receptor using [3H] YM-09151-2 binding against sulpiride in the brain stem of control and experimental rats
cAMP Content in the brain stem of control and experimental Rats
IP3 Content in the brain stem of control and experimental Rats
Real Time amplification of Phospholiase C mRNA in the brain stem of control and experimental rats
Real Time amplification of CREB mRNA in the brain stem of control and experimental rats
Real Time amplification of GLUT 3 mRNA in the brain stem of control and experimental rats
Real Time amplification of Akt-1 mRNA in the brain stem of control and experimental rats
Real Time amplification of TNF-α mRNA in the brain stem of control and experimental rats
Real Time amplification of GDNF mRNA in the brain stem of control and experimental rats
Real Time amplification of BDNF mRNA in the brain stem of control and experimental rats
Real Time amplification of NF-κB mRNA in the brain stem
of control and experimental rats 82
Real Time amplification of SOD mRNA in the brain stem of control and experimental rats 83
Real Time amplification of GPx mRNA in the brain stem of control and experimental rats 83
Real Time amplification of Bax mRNA in the brain stem of control and experimental rats 83
Real Time amplification of caspase-8 mRNA in the brain stem of control and experimental rats 84
DISCUSSION 85
