5.14 Descriptive Statistics of the pre-test scores on self directed learning of Experimental and Control Groups

5.15 Descriptive Statistics of the post-test scores on self directed learning of Experimental and Control Groups

5.16 The results of test of significance of difference between the mean pre-test scores on self directed learning of experimental and control groups

5.17 The results of test of significance of difference between the mean post-test scores on self directed learning of experimental and control groups

5.18 The results of paired t-test for comparing pre-test and post-test scores on self directed learning of experimental group

5.19 The results of paired t-test for comparing pre-test and post-test scores on self directed learning of control group

5.20 ANOVA of pre-test and post-test scores on self directed learning of Experimental and Control Group

5.21 Summary of ANCOVA of post-test self directed learning scores of students in the experimental and control groups

5.22 Adjusted means for the post-test self directed learning scores of students in the experimental and control group

5.23 Descriptive Statistics of the pre-test scores on creativity of Experimental and Control Groups

5.24 Descriptive Statistics of the post-test scores on creativity of Experimental and Control Groups

5.25 The results of test of significance of difference between the mean pre-test scores on creativity of experimental and control groups

5.26 The results of test of significance of difference between the mean post-test scores on creativity of experimental and control groups

5.27 The results of paired t-test for comparing pre-test and post-test scores on creativity of experimental group

5.28 The results of paired t-test for comparing pre-test and post-test scores on creativity of control group

5.29 ANOVA of pre-test and post-test scores on creativity of Experimental and Control Group
5.30 Summary of ANCOVA of post-test creativity scores of students in the experimental and control groups

5.31 Adjusted means for the post-test creativity scores of students in the experimental and control group

5.32 Descriptive Statistics of the pre-test scores on Academic Achievement of Experimental and Control Groups

5.33 Descriptive Statistics of the post-test scores on Academic Achievement of Experimental and Control Groups

5.34 The results of test of significance of difference between the mean pre-test scores on academic achievement of experimental and control groups

5.35 The results of test of significance of difference between the mean post-test scores on academic achievement of experimental and control groups

5.36 The results of paired t-test for comparing pre-test and post-test scores on academic achievement of experimental group

5.37 The results of paired t-test for comparing pre-test and post-test scores on academic achievement of control group

5.38 ANOVA of pre-test and post-test scores on Academic Achievement of Experimental and Control Group

5.39 Summary of ANCOVA of post-test achievement scores of students in the experimental and control groups

5.40 Adjusted means for the post-test achievement scores of students in the experimental and control group

5.41 Descriptive Statistics of the pre-test scores on Self directed learning for the sub samples

5.42 Descriptive Statistics of the post-test scores on Self directed learning for the sub samples

5.43 The results of test of significance of difference between the mean pre-test scores on Self directed learning of experimental groups for the sub samples

5.44 The results of test of significance of difference between the mean post-test scores on Self directed learning of experimental groups for the sub samples
The results of paired t-test for comparing pre-test and post-test scores on Self directed learning of experimental group for the sub samples based on gender

The results of paired t-test for comparing pre-test and post-test scores on Self directed learning of sub samples based on locale

The results of paired t-test for comparing pre-test and post-test scores on Self directed learning of sub samples based on type of management

ANOVA of pre-test and post-test scores on Self directed learning of Experimental Group based on gender

Summary of ANCOVA of post-test Self directed learning scores of students in the experimental groups based on gender

Adjusted means for the post-test Self directed learning scores of students in the experimental group based on gender

ANOVA of pre-test and post-test scores on Self directed learning of Experimental Group based on locale

Summary of ANCOVA of post-test Self directed learning scores of students in the experimental groups based on locale

Adjusted means for the post-test Self directed learning scores of students in the experimental group based on locale

ANOVA of pre-test and post-test scores on Self directed learning of Experimental Group based on type of management

Summary of ANCOVA of post-test Self directed learning scores of students in the experimental groups based on type of management

Adjusted means for the post-test Self directed learning scores of students in the experimental and control group based on type of management

Descriptive Statistics of the pre-test scores on Creativity for the sub samples

Descriptive Statistics of the post-test scores on Creativity for the sub samples

The results of test of significance of difference between the mean pre-test scores on Creativity of experimental groups for the sub samples
5.60 The results of test of significance of difference between the mean post-test scores on Creativity of experimental groups for the sub samples

5.61 The results of paired t-test for comparing pre-test and post-test scores on Creativity of experimental group for the sub samples on gender

5.62 The results of paired t-test for comparing pre-test and post-test scores on Creativity of sub samples based on locale

5.63 The results of paired t-test for comparing pre-test and post-test scores on Creativity of sub samples based on type of management

5.64 ANOVA of pre-test and post-test scores on Creativity of Experimental Group based on gender

5.65 Summary of ANCOVA of post-test Creativity scores of students in the experimental group based on gender

5.66 Adjusted means for the post-test Creativity scores of students in the experimental group based on gender

5.67 ANOVA of pre-test and post-test scores on Creativity of Experimental Group based on locale

5.68 Summary of ANCOVA of post-test Creativity scores of students in the experimental and groups based on locale

5.69 Adjusted means for the post-test Creativity scores of students in the experimental group based on locale

5.70 ANOVA of pre-test and post-test scores on Creativity of Experimental Group based on type of management

5.71 Summary of ANCOVA of post-test Creativity scores of students in the experimental groups based on type of management

5.72 Adjusted means for the post-test Creativity scores of students in the experimental group based on type of management

5.73 Descriptive Statistics of the pre-test scores on Academic Achievement for the sub samples

5.74 Descriptive Statistics of the post-test scores on Academic Achievement for the sub samples

5.75 The results of test of significance of difference between the mean pre-test scores on academic achievement of experimental groups for the sub samples
5.76 The results of test of significance of difference between the mean post-test scores on academic achievement of experimental groups for the sub samples

5.77 The results of paired t-test for comparing pre-test and post-test scores on academic achievement based on gender

5.78 The results of paired t-test for comparing pre-test and post-test scores on academic achievement of sub samples based on locale

5.79 The results of paired t-test for comparing pre-test and post-test scores on academic achievement of sub samples based on type of management

5.80 ANOVA of pre-test and post-test scores on Academic Achievement of Experimental Group based on gender

5.81 Summary of ANCOVA of post-test achievement scores of students in the experimental groups based on gender

5.82 Adjusted means for the post-test achievement scores of students in the experimental group based on gender

5.83 ANOVA of pre-test and post-test scores on Academic Achievement of Experimental Group based on locale

5.84 Summary of ANCOVA of post-test achievement scores of students in the experimental groups based on locale

5.85 Adjusted means for the post-test achievement scores of students in the experimental group based on locale

5.86 ANOVA of pre-test and post-test scores on Academic Achievement of Experimental Group based on type of management

5.87 Summary of ANCOVA of post-test achievement scores of students in the experimental groups based on type of management

5.88 Adjusted means for the post-test achievement scores of students in the experimental and control group based on type of management

5.89 Data and results of the test of significance of difference between the mean retained scores on self directed learning of students in experimental and control groups

5.90 Data and results of the test of significance of difference between the mean retained scores on creativity of students in experimental and control groups
