Acknowledgements

First of all, I would like convey my heartiest gratitude to my supervisor Prof. Amitabha Sinha, for his endless encouragements and wise advices. I also want to mention about him for giving me his valuable times throughout the years and helping me with his unique scientific ideas about semiconductor devices and solar cells. Without his active help, apt guidance and excellent and wise scientific support it would not have been possible for me to proceed my research work.

I also take this opportunity to thank all the teachers who have taught us during our Course Work classes. I am also thankful to my colleagues Ashim Kumar Biswas and Sayantan Biswas for their heartiest help for my research work.

I am also thankful to the authorities of the Indian Association for the Cultivation of Science, Kolkata, India, for allowing us to consult their library.

Finally, I would like to express my gratitude to my family for their emotional support.
