List of tables

Table 3. 1a: Correlation analysis of the subjective measures and scores on proficiency tasks in the speaking/understanding domain in L1 40

Table 3. 1b: Correlation analysis of the subjective measures and scores on proficiency tasks in the reading/writing domain in L1 41

Table 3. 2a: Correlation analysis of the subjective measure and scores on proficiency tasks in the speaking/understanding domain in L2 44

Table 3. 2b: Correlation analysis of the subjective measure and scores on proficiency tasks in the reading/writing domain in L2 45

Table 3. 3a: Correlation analysis between L1 and L2 speaking/understanding tasks 48

Table 3. 3b: Correlation analysis between L1 and L2 reading/writing tasks 49

Table 3. 4a: Factors yielded in factor analysis of L1 in Speaking/understanding domain 52

Table 3. 4b: Factors yielded in factor analysis of L1 in Reading/writing domain 52

Table 3. 5a: Factors yielded in factor analysis across domains in L1 54
Table 3. 5b: Factors yielded in factor analysis across domains in L2  

Table 5. 1: Prime and probe combinations employed in experiment 1  

Table 6. 1: Language background information based on the current state (post stroke aphasia data)  

Table 6. 2: Demographic information  

Table 6. 3: Scores on the Western Aphasia battery  

Table 6. 4: Mean reaction time and standard deviations on control tasks
