Acknowledgements

My thesis in the present form has been possible because of unconditional support and enthusiasm of many people. Putting their names on a typed page under the formal heading of ‘Acknowledgements’ would probably be injustice to their contributions.

It gives me great pleasure to express my profound gratitude to my supervisor, Dr. S. Mahalingam. I thank him for his constant support, advice and encouragement at every step of my work. Working in the lab was always comfortable because of unwavering trust and freedom given by Dr. S. Mahalingam.

My sincere gratitude to Dr. Seyed E Hasnain, former director, and Dr. J. Gowrishankar, present director, of CDFD, for their encouragement and provision of all opportunities to excel.

I express my gratitude to Dr. Sunil. K, Manna, Dr. Sanjeev Khosla, and Dr. Abhijit Sardesai for their valuable suggestions and encouragement.

I am extremely thankful to Prabhat, Malli, Vijay, Sree, Gita for creating a wonderful working atmosphere in the lab and making it a lively space to work.

My stay at CDFD has been a memorable one in the company of my friends yashin, Sreenu, Sobhan, Abira who were there always to cheer me up. I also owe a lot to them for their thought provoking discussions and arguments which helped me to improve my intellectual abilities.

I would also like to thank my friends Subbiah, Raghavendra for their constant support.

I am very thankful to Vamsee Krishna, Giri babu and Jagan for all their help. Thanks to all my colleagues and friends at CDFD who have helped me directly or indirectly during this work.

Finally I take this opportunity to thank my family- my father, mother, sister and brother for their persistent encouragement, love, support and strong faith in my abilities, which has helped me to reach this stage.
I am grateful to CSIR for providing me fellowship during this period and also ‘The Dept. of Biochemistry,’ HCU, for providing me PhD registration.

P. Rajendra Kumar
