ACKNOWLEDGEMENT

First and foremost, I have to thank my parents for their endless support and encouragement throughout my life and my wife Archana Gupta for constant motivation and support. I would like to give my sincere thanks to my mentors and express deep gratitude towards Dr. (Mrs.) Kalpana S Joshi (Guide) & Dr. (Mrs.) Sushma G Sabharwal (Co-guide) for their thought provoking ideas, constant inspiration, guidance, encouragement, and unconditional support during the course of my Ph.D work. During the course of this work, I not only learned the ability to design and conduct experiments, but also learned to appreciate the complexity and beauty of herbal and natural science that has provided many drugs to the human mankind.

While working with Dr. Kalpana S Joshi, I learnt about precision in procedures, designing studies and about making intelligent observations in studies. My heartfelt thanks go to her. During the study, I also required help of Dr. Swati Joshi (NCL, Pune) for profiling various extracts. I would also like to extend special thanks to my colleagues, Shyam Awte, and Sushant Shengule in Sinhagad College of Engineering (SCOE), Pune and Sameer Walunj of Symbiosis School of Biomedical Sciences, Symbiosis International University, Lavale, Pune for their precious time and support that during my work. I would also like to give special thanks to my friends and colleagues, Nikhil Shah, Himani Pareek, Shyam Sunder, Azhar Mohammed for their support and senior management colleagues: Dr.Venkata Palle and Dr.Raj Kamboj in Lupin Limited who provided endless support during my work and allowed me to conduct certain in vitro and animal model studies in the research facility.

I am also thankful to all my friends who provided me time to time encouragement and helped during the moments of crisis. Your friendship makes my life a wonderful experience.

I thank the almighty God for always being with me.

Finally, I am grateful to everyone who helped me to successfully accomplish my scientific goals.

Rajesh V Gupta
