List of Tables

Table 1.1 Report indicating marked increase in diabetes (WHO) 2
Table 1.2 Whole blood and plasma values of glucose concentration 16
Table 1.3 Target values to be watched 17
Table 1.4 Diagnosis of GDM with a 100 g glucose load 25
Table 1.5 Nephropathy marker albumins in urine 32
Table 1.6 Blood pressure values in hypertension 32
Table 1.7 Different patterns and phenotypes of retinopathy 40
Table 3.1 Plants selected for the present investigation 85
Table 4.1: Proximate analyses of the plant parts (%) 125
Table 4.2: Fat, protein, Vitamin A and C content of plants 126
Table 4.3: Mineral content in different parts of the plants analyzed 126
Table 4.4: Sample application lay out 130
Table 4.5: Track 1, ID: Methanolic extract (M. charantia) 132
Table 4.6: Track 2, ID: Methanolic extract (T. cordifolia) 133
Table 4.7: Track 3, ID: Methanolic extract (W. somnifera) 134
Table 4.8 Track 4, ID: Methanolic extract (S. cumini) 135
Table 4.9 Track 5, ID: Methanolic extract (Acacia catechu) 136
Table 4.10: Track 10, ID: Methanolic extract (F. benghalensis) 137
Table 4.11: Track 11, ID: Methanolic extract (F. glomerata) 138
Table 4.12: Track 12, ID: Methanolic extract (E. officinales) 139
Table 4.13: Track 13, ID: Methanolic extract (T. foenum) 140
Table 4.14 Track 14, ID: Methanolic extract (T. arjun) 141
Table 4.15: Effects of plant extracts on Lipid peroxidation  

Table 4.16: Amount of secondary metabolites absorbed through 
              Goat intestinal (µg/10min)  

Table 4.17: Genotoxicity assessment (Comet assay)  

Table 4.18: Angiogenic Effect of plant parts by (CAM) assay  

Table 4.19: Effect of plants and formulation on the opacity and permeability 
              of goat cornea  

Table 5.1 Antidiabetic action of FB compound
