LIST OF TABLES

3.1 Number of items and Maximum possible Score for PSAI 81
3.2 Four areas in the Knowledge Questionnaire with the corresponding Number of Questions and Maximum Possible Scores 84
3.3 Numbers of Items and Maximum Possible Score for BDI 88
3.4 Numbers of Items and Maximum Possible Score for STAI 89
4.1 Socio personal Characteristics in terms of Frequencies and Percentage 107
4.2 Prevalence of General Anxiety STAI during Trimesters of Pregnancy and Postnatal period 113
4.3 Mean SD and Level of Significance of General Anxiety (STAI), both State Anxiety (ST) and Trait Anxiety (TR) Across Trimesters of Pregnancy and Postnatal period 114
4.4 Distribution of PSA during Trimesters of Pregnancy and Postnatal period 115
4.5 Mean Standard Deviation and Level of Significance of PSA across Trimesters of Pregnancy and Postnatal period 116
4.6 Distribution of Anxiety of Being Pregnant (ABP) during Trimesters of Pregnancy and Postnatal period 117
4.7 Mean, SD and Level of Significance of Anxiety of Being Pregnant (ABP) across Trimesters of Pregnancy and Postnatal period 118
4.8 Distribution of Anxiety about Childbirth (ACB) during Trimesters of Pregnancy and Postnatal period 119
4.9 Mean, SD and Level of Significance of ACB across Trimesters of Pregnancy and Postnatal period

4.10 Distribution of Anxiety about Breastfeeding (ABF) during Trimesters of Pregnancy and Postnatal period

4.11 Mean, SD and Level of Significance of Anxiety about Breastfeeding (ABF) across Trimesters of Pregnancy and Postnatal period

4.12 Distribution of Anxiety about Newborn Care (ANB) during Pregnancy and Postnatal period.

4.13 Mean, Standard deviation and Level of Significance of Anxiety about Newborn Care (ANB) across Trimesters of Pregnancy and Postnatal period

4.14 Distribution of Depression during Pregnancy and Postnatal period.

4.15 Mean SD and Level of Significance of Depression across the Trimesters of Pregnancy and Postnatal period.

4.16 The Mean, Mean Percentage, SD and SD Percentage of Knowledge scores of Pregnant Women regarding Five Selected aspects of Antenatal Care

4.17 Distribution of Knowledge of Pregnant women regarding Selected Five aspects of Antenatal Care.

4.18 Correlation of Pregnancy Specific Anxiety and General Anxiety Scores with Knowledge regarding Five Selected aspects of Antenatal Care

4.19 Correlation of Depression with Knowledge Scores
4.20 Mean, SD and Test of Significance of Mean Scores of STAI, PSAI and BDI with Nulliparous and Parous Pregnant Women using GLM -Repeated Measures.

4.21 Mean, SD and Level of Significance of Mean Scores of each Section of PSAI with Nulliparous and Parous Pregnant Women GLM -Repeated Measures Analysis.

4.22 Summary of GLM -Repeated Measures Analysis of Pregnancy Specific Anxiety, each Section of Pregnancy Specific Anxiety, General Anxiety and Depression with respect to Socio-personal Variables (Significance 0.05)

4.23 Summary of Chi -square Test between Selected Five aspects of Knowledge of Antenatal Care and Socio-personal Variable and Significance

4.24 Distribution of Frequency and Percentage of Labour Outcome in relation to Third Trimester Pregnancy Specific Anxiety and Chi-square Values.

4.25 Socio personal Characteristics in terms of Frequencies and percentage

4.26 Mean, Standard Deviation and Level of Significance of Pre-test Scores of State Anxiety, Trait Anxiety, STAI, BDI and PSAI of Control Experimental groups

4.27 Mean and Standard Deviation of Pretest, Posttest and Post-delivery Scores of PSA and Four Sections of PSA in Control and Experimental groups
4.28 Summary of GLM -Repeated Measures Analysis of PSA and Section wise Pregnancy Specific Anxiety with respect to Control and Experimental Groups

4.29 Mean, SD and Level of Significance of Post-test Scores of STAI, State Anxiety and Trait Anxiety in Control and Experimental groups

4.30 Mean and Standard Deviation of Pre-test and Post-test Scores of Five Selected aspects and Total Knowledge Scores in Control and Experimental groups

4.31 Mean Gain and Level of Significance of Knowledge of Antenatal care in Control and Experimental groups

4.32 Post test Mean, SD and Test of Significance of Knowledge of Antenatal care in Control and Experimental groups

4.33 Distribution of Labour Outcomes among Control and Experimental groups

4.34 Distribution of Prenatal BDI scores of Control and Experimental groups

4.35 Distribution of Postnatal BDI Scores of Control and Experimental Groups

4.36 Mean, Standard Deviation and Test of Significance of Pre-test and Post-test Scores of Depression in Control and Experimental group
