

LIST OF TABLES

No.	Title	Page No
1	Hot spots for errors in the transfusion process	8
2	Non-infectious transfusion related complications	9
3	Estimated risk associated with infectious complications	19
4	Preventable and non preventable adverse events	19
5	Name, abbreviation and year of establishment of some well-known haemovigilance system	25
6	Advantages and disadvantages of various types of governance of haemovigilance system	32
7	Some countries and their method of governance of haemovigilance systems	32
8	SHOT reporting categories	33
9	Questionnaire used for the collection of data	68
10	Comparison chart of HV aspects of BRICS countries, USFDA and European Union,	70
11	Distribution of blood products issued for transfusion during the study period	73
12	Adverse transfusion reactions reported during the study period	74
13	Total events regarding with donation of blood during the study period	76
14	Distribution of donor reactions	76
15	Frequency of vasovagal reactions	77
16	Frequency of needle injury	77
17	Distribution according to total events	77
18	Distribution of blood donations and prevalence of vasovagal reactions based on gender	78
19	Distribution of vasovagal reactions based on the age of donors	79
20	Distribution of vasovagal reactions based on the phase of blood donation	79
21	Distribution of reported hypotensive reactions based on gender of donors	79
22	Distribution of number of blood banks selected for the study	81

No	Title	Page No
23	Percentage of blood processed in to components by blood banks under study	82
24	Response of blood banks with regard to demand of components in own clinical facility	83
25	Types of blood components prepared by blood banks under study	84
26	Responses of participants with regard to haemovigilance programme of India	85
27	Questions and replies of blood banks with regard to adverse transfusion reaction	86
28	Questions and replies of blood banks regarding with haemovigilance programme of India	88

LIST OF FIGURES

Fig No.	Title	Page No.
1.	Structure of Brazilian haemovigilance	40
2.	Time line of development of Brazilian haemovigilance system	41
3.	Some important events and developments associated with HvPI	46
4.	Important steps in the development of <i>Haemo-vigil</i> software	47
5.	Roles and Responsibilities of HvPI units	50
6.	Data communication process in HvPI	51
7.	Objectives of NBDVP	52
8.	Roadmap of NBDVP	53
9.	Structure of US Biovigilance Network	58
10.	Organization of Haemovigilance network in France	63
11.	Reporting pattern of Recipient Adverse events through e-FIT software	63
12.	Organisation of Trip	66
13.	Reporting to SHOT	67
14.	Percentage distribution of blood products issued for transfusion	74
15.	Adverse transfusion reactions reported	75
16.	Percentage of blood processed in to components by blood banks under study	82
17.	Response of blood banks with regard to demand of components in own clinical facility	83
18.	Types of blood components prepared by blood banks	84
19.	Responses of participants in regard to haemovigilance programme of India	85
20.	Questions and replies of blood banks regarding with adverse transfusion reaction	87
