SUBJECT INDEX

Age-conditional probabilities of developing cancer, 20, 95, 98
Age-specific incidence and mortality rates, 9, 34
Age-standardized incidence and mortality rates, 11, 33
Age-weighting, 26, 103
Annual percent change, 14
Average annual percent change, 17, 66
Burden of cancer, 102
Crude incidence and mortality rates, 10, 33
Cumulative risk, 23, 97, 98
Disability-adjusted life years, 7, 27
Discounting, 26, 103
Incidence rates, 32
Log linear model, 3
Hospital Based Cancer Registry, 2
Joinpoint regression model, 16
Mortality rates, 32
Percent change, 64
Person-years at risk, 9
Poisson regression model, 3
Population-Based Cancer Registry, 2
Probability of developing cancer, 19
Risk factors of cancers, 51-57
Time trend, 12
Years of life lived with disability, 3, 25
Years of life lost, 3, 25
