**LIST OF TABLES**

Table-1.1: Reactive oxygen species.

Table-1.2: Reactive nitrogen species.

Table.1.3. Commonly-reported drugs associated with drug induced liver injury (DILI).

Table.4.1. Effect of *C.fenestratum* extract on apoptotic morphology.

Table.6.1: Changes in antioxidant levels (GPx, GSH and SOD) in whole body irradiated mice brain, liver, and kidney homogenates (radiation dose 2 Gy, 6 Gy and 10 Gy) with and without oral administration of *A.calamus* extract (250mg/kg body weight).

Table.6.2.(a) Changes in antioxidant levels (GPx, GSH and SOD) in whole body irradiated mice brain homogenates (radiation dose 2 Gy, 4 Gy and 8 Gy) with and without oral administration of α-asarone and *H.indicus* extract (250mg/kg body weight).

Table.6.2.(b) Changes in antioxidant levels (GPx, GSH and SOD) in whole body irradiated mice liver homogenates (radiation dose 2 Gy, 4 Gy and 8 Gy) with and without oral administration of α-asarone and *H.indicus* extract (250mg/kg body weight).

Table.6.2.(c) Changes in antioxidant levels (GPx, GSH and SOD) in whole body irradiated mice kidney homogenates (radiation dose 2 Gy, 4 Gy and 8 Gy) with and without oral administration of α-asarone and *H.indicus* extract (250mg/kg body weight).

Table.6.3. Effect of *A.calamus* extract, α-asarone and *H.indicus* extract on hematological parameters (WBC count, Hb and GSH) in mice exposed to 6Gy whole body γ-radiation.

Table 8.1. Effect of *A.calamus* extract and α-asarone on micronucleus induction in mouse peripheral blood reticulocytes by 2 Gy whole body irradiation.
1000 reticulocytes of peripheral blood were observed and % of micronucleated reticulocytes was scored.

Table 8.2. Effect of A. calamus extract and α-asarone on the induction of individual aberrations and number of aberrations per cell in mouse bone marrow cells by 2 Gy whole body irradiation (n=5).

Table 8.3. Effect of oral administration of A. calamus extract and α-asarone on the induction of polyploidy, SDC and pulverization in mouse bone marrow by 2 Gy whole body irradiation (n=5).

Table 9.1. Effect of pre and post treatment of A. calamus extract and α-asarone on serum Albumin, Bilirubin, Globulin and Total protein in acetaminophen induced hepatotoxicity in mice.

Table 9.2. Effect of A. calamus extract and α-asarone on antioxidants level in acetaminophen induced hepatotoxicity in mice.

Table 10.1. Effect of A. calamus extract (ACE) and α-asarone on antioxidants level in doxorubicin induced cardiotoxicity in mice.

Table 11.1. Effect of p.o. administration of A. calamus extract and α-asarone on cisplatin induced decrease in renal antioxidant enzymes.
