ACKNOWLEDGEMENT
This thesis is the end of my journey in obtaining my Ph.D. I have not traveled in a vacuum in this journey. This thesis has been kept on track and been seen through to completion with the support and encouragement of numerous people including my well wishers, my friends, family members, colleagues and various institutions. At the end of my thesis I would like to thank all those people who made this thesis possible and an unforgettable experience for me.

At this moment of accomplishment, first of all I pay homage to my supervising teacher, Dr. K.K. Janardhanan, Professor, Amala Cancer Research Centre, for his masterly guidance, crisp advice, timely help, unwavering support, valuable suggestions and constant encouragement extended to me during the course of this work. All his contributions of time, ideas, and strain made my Ph.D. experience productive and stimulating.

I dedicate this work to my loving dad, Late Adv K. Narayana Panicker who is always living in my heart. It was his dream which I am fulfilling by this degree, and I hope to continue to work with his loving memories and blessings. He is my energy and guiding light throughout my life. I am sure he will be watching me from heaven and will be really happy to see me completing my Ph.D work. This work would not have been possible without his blessings and love.

No words shall suffice in thanking Dr. Ramadasan Kuttan, Research Director, Amala Cancer Research Centre, for his helping hand, valuable suggestions, whole hearted support and encouragement.

I am also extremely indebted to Dr. TA. Ajith, Associate Professor, Dept. Biochemistry, Amala Institute of Medical Sciences, Amala Nagar, Thrissur, for his inevitable suggestions throughout my Ph.D work. The joy and enthusiasm he has for his research was contagious and motivational for me, even during tough times in the Ph.D. pursuit. I am also thankful for the excellent example he has provided as a successful researcher and a human being.

I express my sincere thanks to Padma Bhushan Rev. Fr. Gabriel CMI, Founder Director. Former Directors, Rev. Fr George Pius, Rev. Fr Paul Achandy CMI; Former Joint Director Rev.Fr. Thomas Chakkramakil; Director Rev. Fr. Walter Thelappilly CMI, Amala Cancer Hospital and Research Centre for permitting me to carry out the work here.

I express my deep sense of gratitude to Dr. Girija Kuttan, Dr. Jose Padikkala, Dr. CRK Nair, Dr.TD Babu and Dr.Achuthan for the sincere help and support extended to me during my work.
I take this opportunity to sincerely acknowledge Professor CV Krishnan, Department of Chemistry, Stony Brook University and Garnett Mc Keen Laboratory, Inc., Bohemia, NY 11716-1735, USA for their carrying out their project work on POLY MVA in the Dept of Microbiology, Amala Cancer Research Centre which helped me in molding the structure of my Ph.D work.

Most of the results described in this thesis would not have been obtained without a close collaboration with few laboratories. I am thankful to Dr. V. Ramnath, Asso. Professor, Dept. of Veterinary Physiology, College of Veterinary and Animal Science, Kerala Agricultural University, Mannuthy, Thrissur, Kerala, 680 651, India for his help in spectrophotometric analysis. I owe a great deal of appreciation and gratitude to staffs of Sree Chitra Tirunal Institute for Medical Sciences & Technology (SCTIMST), Thiruvananthapuram for carrying out the HPLC analysis and Dr B Nitha, Scientist, Centre for Medicinal Plant Research, Kottakkal for carrying out the HPTLC analysis.
