LIST OF TABLES

Table 3.1. Effect of post irradiation oral administration of CAE on micronucleus induction in mouse peripheral blood reticulocytes by whole body irradiation (2 Gy)

Table 3.2. Change in the GSH levels expressed in n moles/mg protein in brain and liver tissues of mice orally administrated with 200 mg/kg body weight of CAE prior to 2, 4 and 10 Gy γ-radiation exposure

Table 3.3. Changes in the lipid peroxidation levels are expressed as nmol malondialdehyde/mg protein

Table 4.1. Effect of post irradiation oral administration of CAE on micronucleus induction in mouse peripheral blood reticulocytes by whole body irradiation (2 Gy)

Table 4.2. Change in the GSH levels expressed in n moles/mg protein in brain and liver tissues of mice orally administrated with 50 mg/kg body wt of asiaticoside prior to 2, 4 and 10 Gy γ-radiation exposure

Table 4.3. Change in the GPx levels expressed in U/mg protein in brain and liver tissues of mice orally administrated with 50 mg/kg body wt of asiaticoside prior to 2, 4 and 10 Gy γ-radiation exposure

Table 5.1. Effect of hydroalcoholic extract of RCE on serum urea and creatinine levels in mice treated with cisplatin

Table 5.2. Effect of Cisplatin administration on renal antioxidant enzymes in Swiss albino mice
