LIST OF FIGURES
Figure 1.1. Suppression of immune system by tumour cells
Figure 1.2. Formation of a cancer metastasis
Figure 1.3. The process of angiogenesis
Figure 1.4. Cell cycle and its regulation
Figure 1.5.A. *Aerva lanata*
Figure 1.5.B. Chemical structure of 10-Methoxycanthin-6-one
Figure 1.5.C. Chemical structure of Thujone
Figure 2.1.A. TLC of 10-Methoxycanthin-6-one
Figure 2.1.B. $^1$H NMR of 10-Methoxycanthin-6-one
Figure 3.1.A. Effect on DLA induced solid tumour development
Figure 3.1.B. Effect on induction of tumour cell apoptosis by TUNEL assay
Figure 3.2.A. Effect of *A. lanata* on viability of tumour cells
Figure 3.2.B. Effect of 10-Methoxycanthin-6-one on viability of tumour cells
Figure 3.3.A. Effect on viability of tumour cells by MTT assay
Figure 3.3.B. Effect on tumour cell proliferation by $^3$H-Thymidine incorporation assay
Figure 3.4.A. Effect on carrageenan induced paw edema
Figure 3.4.B. Effect on dextran induced paw edema
Figure 3.4.C. Effect on formalin induced paw edema
Figure 3.5. Effect on iNOS and COX-2 gene expression in LPS-stimulated macrophages
Figure 3.6. Effect on TNF-α, IL-1β and IL-6 gene expression in LPS-stimulated macrophages
Figure 4.1.A. Effect on total WBC count
Figure 4.2.A. Effect on circulating antibody titre
Figure 4.2.B. Effect on plaque forming cells in spleen
Figure 4.3.A. Effect on NK cell mediated target cell lysis
Figure 4.3.B. Effect on antibody-dependent cell-mediated cytotoxicity
Figure 4.3.C. Effect on antibody-dependent complement-mediated cytotoxicity
Figure 5.1. Effect on lung tumour nodule formation and histopathology
Figure 5.2. Effect on the expression of pro and anti metastatic genes
Figure 5.3.A. Effect of 10- Methoxycanthin-6-one on natural killer cell mediated target cell lysis
Figure 5.3.B. Effect on antibody-dependent cell-mediated cytotoxicity
Figure 5.3.C. Effect on antibody-dependent complement-mediated cytotoxicity
Figure 5.4. Effect on collagen matrix invasion of B16F-10 cells
Figure 5.5.A. Effect of A. lanata on MMP production by B16F-10 cells
Figure 5.5.B. Effect of 10- Methoxycanthin-6-one on MMP production by B16F-10 cells
Figure 5.6. Effect of Thujone on MMP production by B16F-10 cells
Figure 6.1. Effect on tumour directed capillary formation
Figure 6.2. Effect on vascular density by matrigel plug assay
Figure 6.3. Effect on microvessel outgrowth from rat aortic ring
Figure 6.4. Effect on endothelial cell motility by scrape wound assay
Figure 6.5. Effect on collagen matrix invasion of HUVECs
Figure 6.6. Effect on endothelial cell tube formation
Figure 6.7.A. Effect of A. lanata on MMP production by HUVECs
Figure 6.7.B. Effect of 10- Methoxycanthin-6-one on MMP production by HUVECs
Figure 6.8. Effect of Thujone on MMP production by HUVECs
Figure 7.1. Effect on morphology of B16F-10 melanoma cells
Figure 7.2. Effect on DNA fragmentation of B16F-10 melanoma cells
Figure 7.3. Effect on apoptosis of B16F-10 melanoma cells by TUNEL assay

Figure 7.4. Effect on cell cycling of B16F-10 melanoma cells

Figure 7.5. Effect on the expression of genes regulating cell cycling and apoptosis

Figure 8.1.A. Effect of 10- Methoxycanthin-6-one on body weight during immunosupression

Figure 8.1.B. Effect of 10- Methoxycanthin-6-one on total WBC count during immunosupression

Figure 8.2.A. Effect of 10- Methoxycanthin-6-one on solid tumour volume in irradiated mice

Figure 8.2.B. Effect of 10- Methoxycanthin-6-one on serum VEGF levels in irradiated mice

Figure 8.3. Effect on the expression of VEGF, HIF-1α and COX-2

Figure 8.4.A. Effect of 10- Methoxycanthin-6-one on proliferation of radiation exposed B16F-10 melanoma cells

Figure 8.4.B. Effect of 10- Methoxycanthin-6-one on colony formation by radiation exposed B16F10- melanoma cells
