ACKNOWLEDGEMENT

This dissertation is the culmination of the effort that I have undertaken over the last few years, which has now borne fruit, only due to the help of a number of people who did their bit in their own ways at one stage or another. It is impossible for me to list down each and every one of them, but a few do merit mention for without them all of this would have remained a distant dream.

Dr. C.K.K Nair, my research guide and mentor, who was instrumental in setting my goals and nurturing my research aptitude with his enthusiasm and guidance. His wisdom, passion towards science and motivation has inspired me to go that extra mile and face challenges. I am grateful to him for inculcating confidence in me and for being patient with me throughout.

Dr. Ramadasan Kuttan, Research, Director, Amala Cancer Research Centre, who supported and encouraged me, whom I always felt very approachable and caring. I thank him for taking care of even the smallest hurdle I faced during these times.

Padmabhooshan Rev. Fr. Gabriel CMI, Founder Director, Rev. Fr. George Pious CMI, Rev. Fr. Paul Achandy, CMI, Rev. Fr. Thomas Chakramakal, CMI and Rev. Fr. Walter Thelapilly, Director, Amala Cancer Hospital and Research Centre, for all administrative support and guidance.

Dr. Pawan K Khanna, Center for Materials for Electronic Technology (CMET), Pune, for providing the silver nanoparticles, Dr. O. D Jayakumar and Dr. A.K Tyagi, Bhabha Atomic Research Centre (BARC), Mumbai for providing the zinc oxide nanoparticles, on which all this work has been built up. I would also like to acknowledge Prof. K.V Rao, Dr. L Belova, Ms. Mei Fang and Mr. K.M Sreekanth, Department of Materials Science and Engineering, Royal Institute of Technology, Stockholm, Sweden for providing the XRD data on silver and zinc oxide nanoparticles.

Dr. Jose Padikkala, Dr. K.K Janardhanan, Dr. Girija Kuttan, Dr. T.D Babu and Dr. C.R Achuthan, Professors, Amala Cancer Research Centre, for their constant support, help and suggestions.

Dr. Sudheeran, Mr. Muthuvel, Mr. Kathiresan and other members of Dept. of Radiotherapy, Amala Institute of Medical Sciences, for their timely help in radiation studies.

Divyasree Sandeep, Jisha Joy, Femi Martin, Saratchandran A Divakaran, Aditya Menon, Cleetus C.C, Mrs. C.G Preetha and Mrs. Hemamalini, all other friends and colleagues, Amala Cancer Research Centre, for their love, support and help that made me feel part of a truly wonderful family.

Dhanya K.C and Gopakumar G Nair, for being with me throughout these years and helping out in all ways possible. In those moments when I felt lost or not capable, I have found support in them. I will always cherish those along with the memories of all fun we had.
Ravisankar Valsalan, Preethi K.C, Dinesh D.C and Arya Menon for the innumerable reference articles they have sent me whenever I pestered them. Shonima G, entails a special mention for always being at a phone call's distance to help and instill some much needed confidence in me.

Students and Staff at Pushpagiri Institute of Medical Sciences and Research Centre, Thriuvalla, Kerala for their help during the final stages of my thesis work.

Ms. Thankamani and Mrs. Sumathi, animal house assistants, Amala Cancer Research Centre, for all the help with maintenance and breeding of animals.

I am indebted to Mahatma Gandhi University, Kerala for granting me a research fellowship to pursue my research.

Vinod V and Dani Mathew, who in spite of being busy spent some sleepless nights to proof read this thesis. Their inputs were invaluable and I sincerely thank them for their time and effort.

Soman K.S and Sudha K.S, Raghu and Ranju for their love, care, support, encouragement and a million other things throughout my life.

My in-laws, V.K Vijayan and Suseela U, along with my brothers, Binoy and Gijoy for their affection and support.

My best friends, Karthika Rajaneesh and Athira Ratheesh, for being with me over these years and understanding me.

Bejoy, my beloved, whose belief in me infused me with confidence to go on. Whenever I stalled or faltered, I have felt his arm around me, nudging me forward. My words will never be enough to say what I feel for being there for me, accepting and understanding me for what I am. He is one big reason I reached this far.

N Ramachandran and P.B Laijumol, my parents, who taught me to be loving and forgiving; just and patient; truthful and responsible in all my deeds. I know they have been selfless in providing me the best of everything and all that I have attained in life is because of them. Hari, my dearest brother, who has been a part of my life for long, has stood by me at all times and whom I will always be proud of. I will never be able thank them enough or love as much as they have loved and cared for me.

My late grandparents, whom I always look forward for blessings and all my family members who have cared for me and understood my difficulties, I thank them wholeheartedly.

God has always shown himself to me in all the above people and countless others throughout my life. I am grateful for all these wonderful people, great moments, happiness and all other gifts that You have showered in my life.

Lakshmy R
