LIST OF FIGURES

1. Map of Kerala showing major collection sites of leiognathids

4.1.1 Morphometrics expressed as percentage of total length in males and females of *Leiognathus equulus*

4.1.2 Morphometrics expressed as percentage of total length in males and females of *Leiognathus brevirostris*

4.1.3 Morphometrics expressed as percentage of total length in males and females of *Leiognathus striatus*

4.1.4 Morphometrics expressed as percentage of total length in males and females of *Aurigequula fasciata*

4.1.5 Morphometrics expressed as percentage of total length in males and females of *Equulites leuciscus*

4.1.6 Morphometrics expressed as percentage of total length in males and females of *Equulites absconditus*

4.1.7 Morphometrics expressed as percentage of total length in males and females of *Eubleekeria splendens*

4.1.8 Morphometrics expressed as percentage of total length in males and females of *Photopectoralis bindus*

4.1.9 Morphometrics expressed as percentage of total length in males and females of *Karalla dussumieri*

4.1.10 Morphometrics expressed as percentage of total length in males and females of *Karalla daura*

4.1.11 Morphometrics expressed as percentage of total length in males and females of *Secutor rucorius*
4.1.12 Morphometrics expressed as percentage of total length in males and females of *Secutor insidiator*

4.1.13 Morphometrics expressed as percentage of total length in males and females of *Gazza minuta*

4.1.14 Morphometrics expressed as percentage of total length in males and females of *Gazza achlamys*

4.2.1 Comparison of stomachs of various stages of fullness in males and females of *Gazza minuta* (March 2005 to Feb.2007)

4.2.2 Comparison of stomachs of various stages of fullness in males and females of *Leiognathus brevirostris* (March 2005 to Feb.2007)

4.2.3 Comparison of stomachs of various stages of fullness in males and females of *S. insidiator* (March 2005 to Feb.2007)

4.2.4 Comparison between the occurrences of poorly fed males and females of *Gazza minuta* (pooled for two years)

4.2.5 Comparison between the occurrence of actively fed males and females of *Gazza minuta* (pooled for two years)

4.2.6 Comparison between the occurrence of poorly fed males and females of *L. brevirostris* (pooled for two years)

4.2.7 Comparison between the occurrence of actively fed males and females of *L. brevirostris* (pooled for two years)

4.2.8 Comparison between the occurrence of poorly fed males and females of *S. insidiator* (pooled for two years)

4.2.9 Comparison between the occurrence of actively fed males and females of *S. insidiator* (pooled for two years)
4.2.10 Condition of feed in various length groups of *Gazza minuta* (from Mar. 2005 to Feb. 2007)

4.2.11 Condition of feed in various length groups of *L. brevirostris* (from Mar. 2005 to Feb. 2007)

4.2.12 Condition of feed in various length groups of *L. brevirostris* (from Mar. 2005 to Feb. 2007)

4.2.13 The protracted mouth tubes of A. *Leiognathus brevirostris*, B. *Secutor insidiator* C. *Gazza minuta*

4.3.1 A Relationship between length and weight of *L. brevirostris* (males)

4.3.1 B Length weight relationship of *L. brevirostris* (females)

4.3.1 C Length weight relationship of *L. brevirostris* (pooled)

4.3.2 A Logarithmic length weight relationship of *L. brevirostris* (males)

4.3.2 B Logarithmic length weight relationship of *L. brevirostris* (females)

4.3.2 C Logarithmic length weight relationship of *L. brevirostris* (pooled)

4.3.3 A Length weight relationship of *Gazza minuta* (males)

4.3.3 B Length weight relationship of *Gazza minuta* (females)

4.3.4 A Logarithmic length weight relationship of *G. minuta* (males)

4.3.4 B Logarithmic length weight relationship of *G. minuta* (females)

4.3.5 A Length weight relationship of *Secutor insidiator* (males)

4.3.5 B Length weight relationship of *Secutor insidiator* (females)

4.3.6 A Logarithmic length weight relationship of *S. insidiator* (males)

4.3.6 B Logarithmic length weight relationship of *S. insidiator* (females)

4.4.1 Average ova diameter measurements in various maturity stages of *L. brevirostris*
4.4.2 Average ova diameter measurements in various maturity stages of *G. minuta*

4.4.3 Average ova diameter measurements in various maturity stages of *S. insidiator*

4.4.4 Average size at 50% maturity in female *L. brevirostris*

4.4.5 Average size at 50% maturity in female *G. minuta*

4.4.6 Average size at 50% maturity in female *S. insidiator*

4.4.7 Comparison between the average GSI values of *L. brevirostris* from March 2005 to Feb. 2007

4.4.8 Comparison between the average GSI values of *G. minuta* from March 2005 to Feb. 2007

4.4.9 Comparison between the average GSI values of *S. insidiator* from March 2005 to Feb. 2007

4.4.10 Average ova diameter of *L. brevirostris* during various months (from March 2005 to Feb.2007)

4.4.11 Average ova diameter of *G. minuta* during various months (from March 2005 to Feb.2007)

4.4.12 Average ova diameter of *S. insidiator* during various months (from March 2005 to Feb.2007)

4.4.13 Logarithmic relationship between total length and fecundity in *L. brevirostris*

4.4.14 Logarithmic relationship between body weight and fecundity in *L. brevirostris*

4.4.15 Logarithmic relationship between ovary weight and fecundity in *L. brevirostris*
4.4.16 Logarithmic relationship between total length and fecundity in *G. minuta*

4.4.17 Logarithmic relationship between body weight and fecundity in *G. minuta*

4.4.18 Logarithmic relationship between ovary weight and fecundity in *G. minuta*

4.4.19 Logarithmic relationship between total length and fecundity in *S. insidiator*

4.4.20 Logarithmic relationship between body weight and fecundity in *S. insidiator*

4.4.21 Logarithmic relationship between ovary weight and fecundity in *S. insidiator*

4.4.22 Sex ratio distribution of *L. brevirostris* (pooled) in various months

4.4.23 Sex ratio distribution of *G. minuta* (pooled) in various months

4.4.24 Sex ratio distribution of *S. insidiator* (pooled) in various months

4.5.1 Correlation between GSI and PLW in male *S. insidiator* from Mar. 2005 to Feb. 2007

4.5.2 Correlation between GSI and PLW in female *S. insidiator* from Mar. 2005 to Feb. 2007

4.5.3 Correlation between mean GSI and PLW of males of *S. insidiator* of various stages of maturity

4.5.4 Correlation between mean GSI and PLW of females of *S. insidiator* of various stages of maturity

4.5.5 Correlation between GSI and PLW in male *Photopectoralis bindus* from Mar. 2005 to Feb. 2007
4.5.6 Correlation between GSI and PLW in male *Photopectoralis bindus* from Mar. 2005 to Feb. 2007

4.5.7 Correlation between mean GSI and PLW of males of *P. bindus* of various stages of maturity

4.5.8 Correlation between mean GSI and PLW of females of *P. bindus* of various stages of maturity
