LIST OF TABLES

Table 4.1: Mean and standard deviation of causes of sickness variables ........................................52
Table 4.2: Means and standard deviations of turnaround strategy variables .................................54
Table 4.3: Principal factors of causal variables ..................................................................................56
Table 4.4: Principal factors of strategy variables ..............................................................................58
Table 4.5: Mean scores of causal factors – A comparative perspective of successful and unsuccessful turnaround cases .............................................................60
Table 4.6: Causal factors – Test of difference between successful and unsuccessful cases .............................................................61
Table 4.7: Mean scores of strategy factors – A comparative perspective of successful and unsuccessful turnaround cases ............................................................................63
Table 4.8: Strategy factors – Test of difference between successful and unsuccessful cases .............................................................64
Table 4.9: Mean scores of causal factors – A comparative perspective of Private and Public turnaround cases ..............................................................................66
Table 4.10: Causal factors – Test of difference between Private and Public cases ......................67
Table 4.11: Mean scores of strategy factors – A comparative perspective of Private and Public turnaround cases ..............................................................................68
Table 4.12: Strategy factors – Test of difference between Private and Public cases ..................69
Table 5.1.a: PAT and Networth of Company 1 .................................................................................75
Table 5.2.a: Z-Score values of Company 1 .......................................................................................77
Table 5.1.b: Table showing the comparative sales and Net Profit of top paper organisations in India ........................................................................................................96
Table 5.2.b: Table showing the comparative production and Networth of paper organisations in India ........................................................................................................97
Table 5.3.b: Profit after Tax and Networth of Company 2 ...............................................................98
Table 5.4b: Liquidity position of Company 2 ...................................................................................100
Table 5.5b: Z-score values of Company 2 .......................................................................................101
Table 6.1.a: PAT and Networth of Company 3 .................................................................................115
Table 6.2.a: Z-score values of Company 3 ................................................................. 116
Table 6.3.a: Table showing Financial Leverage and EPS of Company 3 ..................... 119
Table 6.1.b: Profit after Tax (PAT) and Networth of Company during the years 1999 to 2009 ..................................................................................................................... 129
Table 6.2.b: Z-Score values of Company 4 for the years 1999 to 2009 ......................... 130
Table 7.1.a: Z-Score values of Company 5 for the years 1999 to 2009 ......................... 145
Table 7.2.b: Profit after Tax (PAT) and Networth of Company 6 ................................. 160
Table 7.3.b: Z-score values of Company 6 .................................................................. 162
Table 8.1.a: Profit After Tax and net worth of the Company 7 (Rs In Crores) ............... 176
Table 8.2.a: Z-Score values of the Company 7 .......................................................... 178
Table 8.1.b: PAT and Networth of Company 8 ............................................................... 195
Table 8.2.b: Z-score value of Company 8 (Rs. in Cr.) ................................................... 196
Table 9.1: Table showing the commonly observed causes of Industrial sickness of Illustrative cases ..................................................................................................................... 208
Table 9.2: Table showing the comparative Principal factors of causal variables of successful and unsuccessful turnarounds of illustrative cases ............................................. 211
Table 9.3: Table showing the commonly observed turnaround strategies in illustrative cases ................................................................................................................................. 216
Table 9.4: Table showing the Principal factors of strategy variables in successful and unsuccessful turnarounds in illustrative cases ......................................................... 217
Table 9.5: Table showing the Principal factors of causal variables in private and public sector turnarounds in illustrative cases ............................................................ 226
Table 9.6: Table showing the Principal factors of strategy variables in private and public sector turnarounds in illustrative cases ............................................................ 231
