ACKNOWLEDGEMENT

Praise be to Almighty, the God, first and last who made every difficult thing easy for us.

This study was carried out at the University of Kanpur, India. The author is grateful for the support provided by this University to carry out this research.

It is a great pleasure to give due acknowledgement to Dr. D. S. Awasthi of Christ Church College, Kanpur, for his ready advice and support and for suggesting this useful problem for my research, as an advisor. His able guidance and encouragement throughout the course of this study is deeply appreciated.

In addition, the assistance of the Data Processing Center, at the University of Petroleum & Minerals, Dhahran, Saudi Arabia, to carry out part of this research on their computer is gratefully acknowledged.

Finally, I would like to acknowledge the continued encouragement of my brothers and sisters who have patiently endured my time away from them.

The cooperation and efforts of Syed Ishrat Jameel, who spent long hours typing this thesis is also acknowledged.
