Acknowledgements

I express my deep gratitude to my guide Dr. K. P. Mani, for his guidance and support. He had generously spent his valuable hours correcting my drafts with unfailing patience. Thank you sir, for your timely suggestions and insights that helped me to move on all stages of my research work.

I am thankful to Mahatma Gandhi University for giving me an opportunity to conduct my research. I am grateful to the Centre for Development Studies, Thiruvananthapuram for utilising the library during the initial stages of my study. I express my gratitude to Cement Manufacturers’ Association, New Delhi for providing me the data required for the research. I am extremely grateful to IIT Kanpur, in utilising the books and softwares that were essential for the analysis part of my research work.

I am grateful to Dr. P. Ibrahim, whose guidance during the M. Phil course has still influenced me in my thesis work. I am also thankful to Dr. S. Harikumar, for the help and support. I would like to thank the staff and faculty of my research centre, Department of Applied Economics, Cochin University of Science and Technology, Kochi for their assistance.

This thesis is a ‘dream come true’ for my daddy, and his support and enthusiasm was really a driving force behind my research work. I am greatly indebted to my mummy who cared me with patience throughout my research work. I fondly acknowledge the concern given to me by Mohancheta and Binduchechy, Bichettan, and Bijnu. And of course, Eric who always asks me about my work ‘what are you doing binanty?’ I am really grateful to Achan and Amma for being considerate and supportive in this endeavour.
My heartfelt thanks to my beloved friends especially Indu, Asha, Smi and Lollichayan, Divs, for their encouragement, queries about my work, and assistance given to me throughout.

This work would not have been possible without the continuous support, effort, and patience of my Bie who was with me in all my good and bad times that I had gone through during the research work. He had spent considerable time going through the drafts, and has given useful comments. My greatest debt is to my Bie who has helped me in making this adventure a reality, in the midst of his thesis work.

Any mistake in this work can be completely credited into my account. Last, but not the least, I thank the God Almighty for bringing up this work in its finest shape.
Contents

Chapter I Design of the Study 1-31
1.1 Introduction 1
1.2 Technology of Cement Manufacturing 2
  1.2.1 Indian Cement Technology 4
1.3 Review of Literature 7
  1.3.1 Productivity Studies 8
  1.3.2 Productivity Studies of the Indian Manufacturing Sector 8
  1.3.3 International Studies on the Cement Industry 12
  1.3.4 Studies on Indian Cement Industry 12
    1.3.4.1 Studies on Growth and Productivity 13
    1.3.4.2 Technology Related Studies 15
    1.3.4.3 Studies which used Data Envelopment Analysis (DEA) 19
    1.3.4.4 Location and Environment Studies 19
    1.3.4.5 Studies on the Firm Size, Market Structure, and Financial Performance 21
    1.3.4.6 Studies which gives an Overview of the Indian Cement Industry 24
  1.4 Research Problem 28
1.5 Objectives 29
1.6 Hypothesis 29
1.7 Methodology 29
1.8 Limitations of the Study 31
1.9 Scheme of the Study 31

Chapter II Structure of Indian Cement Industry 32-89
2.1 Introduction 32
2.2 Origin of Cement and the Cement Industry in the Global Perspective 33
2.3 Indian Cement Industry Characteristics 37
2.4 Growth and Development of the Indian Cement Industry 42
