LIST OF TABLES

TABLE NO.	TITLE	PAGE NO.
1.1	Fibers and its type, common, family and scientific name	14
1.2	Mechanical properties of natural fibers	16
3.1	Properties of sisal and bamboo fiber	42
3.2	Effects of fiber length and weight percentage on mechanical properties of sisal/unsaturated polyester composites	46
3.3	Tensile, flexural, impact and moisture properties of hybrid composite	50
4.1	Effects of fiber length and weight percentage on mechanical properties of treated sisal/unsaturated polyester composites	57
4.2	Mechanical and moisture absorption properties of treated/untreated hybrid composites at 50:50	60
5.1	Effects of fiber length and weight percentage of mechanical properties of treated 50:50 fiber weight % of sisal/bamboo hybrid unsaturated polyester composites	69
5.2	Comparison of experimental and predicted values of tensile strength of regression model (RM)	85
5.3	Comparison of experimental and predicted values of tensile strength from Neuro-fuzzy model	87
5.4	Comparison of experimental and predicted values of flexural strength of regression model (RM)	88
5.5	Comparison of experimental and predicted values of flexural strength from neuro fuzzy model	89

TABLE NO.	TITLE	PAGE NO.
5.6	Comparison of experimental and predicted values of impact strength from regression model (RM)	91
5.7	Comparison of experimental and predicted values of impact strength from neuro-fuzzy model	92
5.8	Average absolute error of regression and neural fuzzy models	93
5.9	Maximum value of the objective function (Tensile, flexural and impact strength) and optimized fabrication parameter values	97
