ACKNOWLEDGEMENTS

It gives me great pleasure to express my deep sense of gratitude and thankfulness to Dr. Sadhna Puri, Lecturer, D.G. College, Kanpur and Dr. Anil Kumar Saxena, Assistant Director, Central Drug Research Institute, Lucknow, for suggesting the research problem and for their able guidance throughout the course of the present study.

I am highly indebted to Dr. Sanjay Jain for his invaluable suggestions, fruitful criticism with constant encouragement and help to accomplish this task efficaciously.

I wish to express my sincere thanks to Dr. V.P. Kamboj, FNA, Director, CDRI & Dr. A.P. Bhaduri, Head, Division of Medicinal Chemistry, CDRI, for providing the laboratory facilities, to Dr. G.K. Patnaik, Head, Pharmacology Division and his team for providing the biological activity data of the synthesized compounds.

The spectroscopic and analytical data provided by the staff of RSIC, CDRI and financial assistance in the form of fellowship by Council of Scientific & Industrial Research, New Delhi, are greatly acknowledged.

It is a privilege to convey my heartiest thanks to Drs. R.C. Tripathi and P.K. Misra for their invaluable help and stimulating discussions during the accomplishment of this dissertation.

I am thankful to Dr. (Mrs.) Mridula Saxena, Mr. Zahid Ali, Mr. A.S. Kushwaha and all colleagues in the Medicinal Chemistry Division for their vivacious co-operation.

The affectionate encouragement of my father and unstinted support of my family members can hardly be expressed in words.

Neelima Sinha
