## List of Tables

**Table 2.1** Biotyping scheme of *Y. enterocolitica*.

**Table 2.2** Comparison of various genotypic methods used for typing *Y. enterocolitica*.

**Table 2.3** Relationship between biovar, serotype, pathogenicity, ecology and geographic distribution of *Y. enterocolitica*.

**Table 2.4** Biovar and serotypes of *Y. enterocolitica* isolated from India.

**Table 2.5** Virulence associated chromosomal genes of enteropathogenic *Yersinia*.

**Table 2.6** Putative virulence factors produced by *Y. enterocolitica*.

**Table 2.7** Clinical manifestations of biovar 1A *vis-à-vis* known pathogenic biovars of *Y. enterocolitica*.

**Table 2.8** Major immune evasion factors of *Y. enterocolitica*.

**Table 2.9** Characteristics of superoxide dismutases isolated from other organisms.

**Table 4.1** Details of *Y. enterocolitica* strains used in this study.

**Table 4.2** Details of *E. coli* strains and plasmids used in this study.

**Table 4.3** List of antibiotics used in the study.

**Table 4.4** Components provided in the cytokine bead assay (CBA) kit.

**Table 4.5** Concentration of standards with each dilution.

**Table 4.6** List of primers and PCR conditions.

**Table 4.7** PCR components and their concentrations.

**Table 4.8** Preparation of native PAGE.

**Table 4.9** SOD standards and their activity (U/ml).

**Table 4.10** Primers used for site-directed mutagenesis.

**Table 4.11** PCR conditions used for site directed mutagenesis.

**Table 5.1** Percent identity of YeSodA with related species.

**Table 5.2** Percent identity of YeSodB with related species.
Table 5.3  Percent identity of YeSodC with related species.

Table 5.4  CD spectroscopy data showing percent α-helix and β-sheet content in the structures of YeSODs at 28°C and pH 7.

Table 5.5  Changes in the secondary structure of YeSodB strain IP27366 at various temperature and pH.

Table 5.6  Changes in the secondary structure of YeSodB strain IP27407 at various temperature and pH.

Table 5.7  Details of site directed mutagenesis of SodB from strain IP27407 showing successive mutations.
