ACKNOWLEDGEMENT

It is a pleasure to thank those who made this thesis possible and I wish to express my sincere gratitude to them all for being there, for working with me and for helping me.

First and foremost, I would like to express my sincere gratitude to my supervisor Prof. M. Afshar Alam for the continuous support in my Ph.D study and research, for his patience, motivation, enthusiasm, and immense knowledge. His guidance helped me in all the time of research and writing of this thesis. I have learnt from him how to organize basic concepts and new ideas, and how to describe and transmit them with clarity.

My sincere thank also goes to my co-supervisor Prof. Ranjit Biswas for his constant advice, never ending encouragement and insightful comments.

I thank all my fellow colleagues for there support in one form or the other. Special thanks go to Seeja, Parul and Farheen for being there by my side in hours of happiness as well as desperation.

I would also like to thank the office staff for their help rendered during the research.

I am grateful to the reviewers of all my published papers for the suggestions and positive criticism which helped me at every stage to improve my work.

My deepest thanks goes to my husband for bringing calm and good sense in moments of desperation and madness and above all for being there at all times. Without his support and affection this work would have never reached it’s conclusion.
Last but not the least, my extreme gratitude to my parents for their unflagging love and support throughout my life; this dissertation was simply impossible without them.
