LIST OF FIGURES

Fig. 1.1 Geological map of the northern Kerala.
Fig. 1.2 Map of the study area showing locations of Punjavi and Onakkunnu Transects.
Fig. 2.1 The geomorphic map of Punjavi transect.
Fig. 2.2 The geomorphic map of Onakkunnu transect.
Fig. 2.3 Transect elevational sections of Punjavi and Onakkunnu transect showing location and length of cores.
Fig. 2.4 Cross section of Transect I and II showing approximate seaward gradients.
Fig. 3.1 Map showing core locations in the coastal plain area of Punjavi transect.
Fig. 3.2 Map showing core locations in the coastal plain area of Onakkunnu transect.
Fig. 3.3 Environmental discrimination of sediment samples collected from the coastal plain area of Punjavi transect.
Fig. 3.4 Environmental discrimination of sediment samples collected from the coastal plain area of Onakkunnu transect.
Fig. 3.5 Log of core P-1 showing (A) vertical distribution of size parameters and (B) lithology and size frequency distribution.
Fig. 3.6 Log of core P-2 showing (A) vertical distribution of size parameters and (B) lithology and size frequency distribution.
Fig. 3.7 Log of core P-3 showing (A) vertical distribution of size parameters and (B) lithology and size frequency distribution.
Fig. 3.8 Log of core P-4 showing (A) vertical distribution of size parameters and (B) lithology and size frequency distribution.
Fig. 3.9 Log of core P-5 showing (A) vertical distribution of size parameters and (B) lithology and size frequency distribution.
Fig. 3.10 Log of core P-6 showing (A) vertical distribution of size parameters and (B) lithology and size frequency distribution.
Fig. 3.11 Log of core P-7 showing (A) vertical distribution of size parameters and (B) lithology and size frequency distribution.
Fig. 3.12 Log of core P-8 showing (A) vertical distribution of size parameters and (B) lithology and size frequency distribution.
Fig. 3.13 Log of core P-9 showing (A) vertical distribution of size parameters and (B) lithology and size frequency distribution.
Fig. 3.14 Log of core P-10 showing (A) vertical distribution of size parameters and (B) lithology and size frequency distribution.
Fig. 3.15 Log of core O-1 showing (A) vertical distribution of size parameters and (B) lithology and size frequency distribution.
Fig. 3.16 Log of core O-2 showing (A) vertical distribution of size parameters and (B) lithology and size frequency distribution.
Fig. 3.17 Log of core O-3 showing (A) vertical distribution of size parameters and (B) lithology and size frequency distribution.
Fig. 3.18 Log of core O-4 showing (A) vertical distribution of size parameters and (B) lithology and size frequency distribution.
Fig. 3.19 Log of core O-5 showing (A) vertical distribution of size parameters and (B) lithology and size frequency distribution.
Fig. 3.20 Log of core O-6 showing (A) vertical distribution of size parameters and (B) lithology and size frequency distribution.

Fig. 3.21 Log of core O-7 showing (A) vertical distribution of size parameters and (B) lithology and size frequency distribution.

Fig. 3.22 Log of core O-8 showing (A) vertical distribution of size parameters and (B) lithology and size frequency distribution.

Fig. 3.23 Log of core O-9 showing (A) vertical distribution of size parameters and (B) lithology and size frequency distribution.

Fig. 3.24 Log of core O-10 showing (A) vertical distribution of size parameters and (B) lithology and size frequency distribution.

Fig. 3.25 Log of core O-11 showing (A) vertical distribution of size parameters and (B) lithology and size frequency distribution.

Fig. 3.26 Log of core O-12 showing (A) vertical distribution of size parameters and (B) lithology and size frequency distribution.

Fig. 4.1 Map of the study area showing bathymetry and sampling locations in the continental shelf.

Fig. 4.2 Longitudinal profile of continental shelf off (A) Punjaiv and (B) Onakkunnu transects showing bottom configuration

Fig. 4.3 Sediment distribution map of the continental shelf.

Fig. 4.4 Plot of (a) textural classification, (b) organic matter Vs CaCO$_3$, down core variation of (c) sand-silt-clay and (d) CaCO$_3$ and Organic matter in the core S-1.

Fig. 4.5 Plot of (a) textural classification, (b) organic matter Vs CaCO$_3$, down core variation of (c) sand-silt-clay and (d) CaCO$_3$, and Organic matter in the core S-2.

Fig. 4.6 Plot of (a) textural classification, (b) organic matter Vs CaCO$_3$, down core variation of (c) sand-silt-clay and (d) CaCO$_3$ and Organic matter in the core S-3.

Fig. 4.7 Plot of (a) textural classification, (b) down core variation of sand-silt-clay in the core S-4.

Fig. 4.8 Vertical variation of (a) mean (b) standard deviation, (c) skewness and (d) kurtosis of core S-4.

Fig. 4.9 Scatter plots of size parameters of core S-4.

Fig. 4.10 Plot of (a) textural classification, (b) organic matter Vs CaCO$_3$, down core variation of (c) sand-silt-clay and (d) CaCO$_3$ and Organic matter in the core S-5.

Fig. 4.11 Plot of (a) textural classification, (b) organic matter Vs CaCO$_3$, down core variation of (c) sand-silt-clay and (d) CaCO$_3$, and Organic matter in the core S-6.

Fig. 4.12 Plot of (a) textural classification, (b) organic matter Vs CaCO$_3$, down core variation of (c) sand-silt-clay and (d) CaCO$_3$ and Organic matter in the core S-7.

Fig. 4.13 Plot of (a) textural classification, (b) organic matter Vs CaCO$_3$, down core variation of (c) sand-silt-clay and (d) CaCO$_3$, and Organic matter in the core S-8.

Fig. 4.14 Plot of (a) textural classification, (b) organic matter Vs CaCO$_3$, down core variation of (c) sand-silt-clay and (d) CaCO$_3$ and Organic matter in the core S-9.

Fig. 4.15 Plot of (a) textural classification, (b) organic matter Vs CaCO$_3$, down core variation of (c) sand-silt-clay and (d) CaCO$_3$, and Organic matter in core S-10.

Fig. 4.16 Plot of (a) organic matter Vs CaCO$_3$, (b) down core variation of Organic matter and CaCO$_3$ in the core S-4.

Fig. 4.17 Plot of (a) CM diagram and (b) vertical variation of C & M in the core S-4
Cumulative probability and normal size frequency curves of selected sand samples at the depths of (a) 180-185 cm, (b) 200-205 cm, (c) 230-235 cm and (d) 260-265 cm of the core S-4.

Schematic diagram of facies architecture of coastal plain sequence along Punjabi transect.

Schematic diagram of facies architecture of coastal plain sequence along Onakkunnu transect.

Schematic diagram of facies architecture of shelf sequences along (A) Punjabi and (B) Onakkunnu transects.

Generalised sediment distribution map of south west coast (modified after GSI, 1975).

Down core variations in lithology, Oxygen isotope record (Globigerinoides ruber), sand and CaCO$_3$ content of core S-1. Estimated ages of the samples are given on the right side. Last Glacial Maximum (LGM) is marked at the core depth 70 cm (after Singh et al., 2001).

Down core variations in lithology, Oxygen isotope record (Globigerinoides ruber), sand and CaCO$_3$ content of core S-10. Estimated ages of the samples are given on the right side. Last Glacial Maximum (LGM) is marked at the core depth 90 cm (after Singh et al., 2001).

Plot of inferred paleo bathymetry from the cores S-1 and S-10 (from 36 kyr to Present after Singh et al., 2001).

Sea level curve after Chappel and Shackleton (1986).

Sea level curve from 36 kyr to Present along the northern Kerala.

Shoreline positions along the northern Kerala coast from 36 kyr to Present.
