Chapter No. III

AIMS & OBJECTIVES

Page No. 35
Chapter III

AIMS AND OBJECTIVES

1. To determine levels of biochemical parameters such as serum and urinary creatinine, uric acid, calcium, inorganic phosphorus, sodium, potassium, chloride, urea and urinary citrate, magnesium, oxalate in nephrolithiasis patients with respect to control.

2. To find out causative agents/factors for nephrolithiasis.

3. To determine the diagnostic and prognostic significance of above parameters for nephrolithiasis.

4. To explore relationship(s) among these parameters in nephrolithiasis patient.

5. To find out ways to avoid nephrolithiasis.
