At the very outset, I sincerely acknowledge with deep faith the omnipotent help of God the Almighty without whose grace and blessing all my endeavors borne no fruit.

For the successful accomplishment of any task, constant inspiration, encouragement, affection, blessing and able guidance play an important role. To acknowledge such people and institutions is not a formality, but is the feeling of gratitude.

Words fall short to express my heartfelt gratitude and indebtedness to my mentor **Dr. M. P. Singh**, Senior Scientist, CSIR-Indian Institute of Toxicology Research (CSIR-IITR), Lucknow, for his support, excellent guidance and positive outlook in science and in life as well. He has provided me independence, encouragement, motivation and friendship throughout the course of this work. His time, patience and scientific discussions were asset to my research and his contribution goes beyond any measurable value.

I am extremely thankful to my supervisor **Prof. S. K. Jain**, Department of Biotechnology, Faculty of Science, Jamia Hamdard, New Delhi, for his constant inspiration, scientific interest, great insight and guidance throughout my programme. He is a person with extraordinary research skills and academic depth, a teacher who has devoted his life in enlightening the minds of so many.

I would like to express my sincere thanks, gratitude and humble appreciation to **Dr. Chetna Singh**, Senior Scientist, Developmental Toxicology Division, CSIR-IITR, Lucknow for her generous help and valuable suggestions on various realms during this study.

My great thanks are extended to present Director Dr. K. C. Gupta and former Director Dr. Ashwani Kumar for providing all necessary facilities to carry out my whole thesis work at IITR, Lucknow.

I sincerely thank the Vice-Chancellor Dr. G. N. Qazi, Jamia Hamdard, New Delhi for giving me the opportunity for PhD enrolment.

Words alone are inadequate to express my deep sense of gratitude and indebtedness to teaching and nonteaching staff and also to Mr. Anish Cherian of Department of
Biotechnology, Faculty of Science, Jamia Hamdard, New Delhi, for their cooperation during entire tenure of my research work.

I take this opportunity to convey my special thanks to Dr. D. K. Patel and Dr. Dhirendra Singh for their guidance in research work.

It gives me immense pleasure to thank my seniors Dr. Virendra Singh, Dr. Ghanshyam Upadhyay, Dr. Seema Singh, Dr. Israr Ahmad, Dr. Ashutosh Kumar and Dr. Anand Kumar Singh for their co-operation and help.

It is with pleasure that I wish to acknowledge my colleagues Smriti, Sharawan, Satya, Manindra, Brajesh, Garima, Anubhuti, Vinod, Sonal, Amit, Deepali, Ashish, Divya and Pratibha for their co-operation and cheerful company.

I salute all my friends around Dr. Awanish, Dr. Gajendra, Ambuj, Dr. Bijay, Shambhoo, Abhishek and others for all the exciting moments and experience.

I am also thankful Mr. Om Prakash (Lab attendant) for his constant help during experiments. I would also like to express my sincere thank to all the experimental animals who accepted silent death for human welfare.

I am grateful to the University Grant Commissions, New Delhi, for providing me research fellowship throughout my Ph.D. programme.

Although I have acknowledged many persons for their moral boosting, encouragement, co-operation and timely help but undoubtedly my parents are the chief contributors. The whole of my life and education bears the stamp of sacrifice, love, care, affection and blessings by my parents. The contribution of my family members, my brother Sandeep Singhal, my sisters Sarita, Seema and Reena in completion of this work has no bounds. It is their endeavour which motivated me throughout.

Finally & most importantly I would like to express my gratitude to my beloved wife Shivani whose continuous encouragement and sincerity make me so patient and strong to finish this programme.

Lucknow
