

## ACKNOWLEDGEMENTS

---

*First and foremost, I express my gratefulness to the lord Almighty for the abundant blessings showered on me throughout my life.*

*This thesis is a result of the person who has dedicated her full soul over this is no one other than my respectable guide, **Dr. S. SHAILAJHA**, for her mission and vision “**only high quality work will make us succeed over the hurdles**”, and her invaluable guidance, motivation and constant encouragement and fruitful discussions throughout my research work. But for her constant encouragement and help, the successful completion of my research would not have been possible.*

*I extend my sincere thanks to all the faculty members in Department of Physics.*

*I am highly grateful thanks to **Dr. KRISHNAN BALASUBRAMANIAN**, Professor and Head, IIT Madras, Chennai for supplementing the necessary experimental setup for Pulse Echo Technique.*

*I extend my heartfelt thanks to **Dr. P. VASANTHARANI**, Professor, and **Dr. R. EZHIL PAVAI**, Assistant Professor, Department of Physics, Annamalai University, Chidambaram for providing the lab facility of ultrasonic interferometer setup for velocity, density and viscosity measurements.*

*I take this opportunity to acknowledge XRD facility in Department of Physics, Manonmaniam Sundaranar University, Tirunelveli, IIT – SAIF, Madras and Centre for Nanoscience and Nanotechnology, University of Madras for other characterization facilities which are carried out for the entire research work.*

*I pay my immense gratitude to my family members, whose moral support take me to attain this position. And at the last but not least I thank my friends who helped me to bring this thesis in a complete form.*

**(K. GEETHA)**
