

LIST OF FIGURES

Figure No	Title	Page No
1.1	Second Harmonic Generation	9
1.2	Third Harmonic Generation	13
1.3	(a) Self-focusing and (b) Self-defocusing of light beam in a non-linear medium	15
1.4	Classification of Nucleation	18
2.1	Pictorial representation of Bragg's law	37
2.2	Schematic diagram of FT-IR spectrometer	60
2.3	Schematic representation of energy level diagram of Raman scattering	65
2.4	Schematic diagram of FT-Raman spectrometer	68
2.5	Relative energies of electronic transition in UV- vis region	71
2.6	Schematic diagram of a double-beam UV-vis spectrophotometer	73
2.7	Schematic experimental setup for SHG efficiency measurement.	74
3.1	d_{norm}	95
3.2	Schematic diagram of a surface normal n and two principal directions u and v	96
3.3	Fingerprint plot	98
4.1	The photograph of the grown LLS single crystals	101
4.2	(a) The molecular structure of LLS, displacement ellipsoids are drawn at the 50% probability level (b) Projection of the structure along the b-axis showing the hydrogen bonds as dashed times.	106
4.3	Optimized molecular structure of LLS	107
4.4	Correlation graph of calculated and experimental bond lengths of LLS	109
4.5	The FT-IR spectra of LLS molecule (a) experimental (b)	110

	theoretical	
4.6	The FT-Raman spectra of LLS molecule (a) experimental (b) theoretical	111
4.7	HOMO and LUMO orbital plots of LLS	118
4.8	Density of states diagram of LLS	119
4.9	Partial density of states diagram of LLS	119
4.10	Crystal orbital overlap population diagram of LLS	120
4.11	Electrostatic potential surface (mesh) plot of LLS	122
4.12	Natural population chart of LLS	126
4.13	UV-vis absorption spectrum of LLS	128
4.14	Tauc's plot $[(\alpha h\nu)^2 \text{ vs } h\nu]$ for LLS	129
4.15	Three-dimensional plots of d_{norm} , d_i , d_e and two-dimensional fingerprint plots of various intermolecular interactions of LLS	130
5.1	The photograph of the grown ZSD single crystals	134
5.2	Optimized molecular structures of ZSD	137
5.3	Correlation graph for ZSD	138
5.4	The FT-IR spectra of ZSD (a) experimental (b) theoretical	140
5.5	The FT- Raman spectra of ZSD (a) experimental (b) theoretical	140
5.6	Natural atomic charge distribution chart of the ZSD	146
5.7	HOMO and LUMO plots of ZSD	148
5.8	Density of states diagram of ZSD	149
5.9	Partial density of states diagram of ZSD	149
5.10	Crystal orbital overlap population diagram of ZSD	150
5.11	UV-vis absorption spectrum of ZSD	151
5.12	Tauc's plot $[(\alpha h\nu)^2 \text{ vs } h\nu]$ for ZSD	152
5.13	Hirshfeld surface mapped with shape index for the ZSD	153
5.14	Finger print plot of ZSD	153
6.1	The photograph of the grown TONP single crystals	157
6.2	Optimized molecular structure of the TONP	159

6.3	Correlation graph of TONP	162
6.4	The IR spectra of TONP (a) experimental and (b) theoretical	165
6.5	The Raman spectra of TONP (a) experimental ad (b) theoretical	166
6.6	UV-vis absorption spectrum of TONP	170
6.7	Tauc's plot for the TONP	171
6.8	Frontier molecular orbitals of the TONP	172
6.9	DOS,PDOS & COOP spectrum of TONP	173
6.10	Electrostatic potential surface plot of TONP	174
6.11	The calculated natural atomic charges of the TONP	177
6.12	Three-dimensional plots of d_{norm} , d_b , d_e and two-dimensional fingerprint plots of TONP	180
7.1	The photograph of the grown PDNB single crystals	184
7.2	Optimized molecular structure of the PDNB	187
7.3	Correlation graph of PDNB	187
7.4	The IR spectra of the PDNB(a) experimental and (b) theoretical	192
7.5	The Raman spectra of the PDNB(a) experimental and (b) theoretical	193
7.6	UV-vis spectra of the PDNB	196
7.7	Tauc's plot for the PDNB	197
7.8	Frontier molecular orbitals of the PDNB	198
7.9	DOS spectrum of PDNB	200
7.10	PDOS spectrum of PDNB	200
7.11	COOP spectrum of PDNB	201
7.12	Electrostatic potential surface plot of PDNB	202
7.13	The calculated natural atomic charges of the PDNB	206
7.14	Three-dimensional plots of d_{norm} , d_b , d_e and two-dimensional fingerprint plots PDNB	208
8.1	The photograph of the grown ZNB single crystals	212
8.2	Optimized molecular structure of the ZNB	214

8.3	Correlation graph of ZNB	215
8.4	The IR spectra of the ZNB (a) experimental and (b) theoretical	218
8.5	The Raman spectra of the ZNB (a) experimental and (b) theoretical	219
8.6	HOMO and LUMO plots of ZNB	222
8.7	Density of states diagram of ZNB	223
8.8	Partial density of states diagram of ZNB	224
8.9	Crystal orbital overlap population diagram of ZNB	224
8.10	UV-vis spectra of ZNB	225
8.11	Tauc's plot for the ZNB	226
8.12	Electrostatic potential surface plot of ZNB	228
8.13	Natural population chart of ZNB	230
8.14	Three-dimensional plots of d_{norm} , d_b , d_e and two-dimensional fingerprint plots of ZNB	232

LIST OF TABLES

Table No	Title	Page No
4.1	Crystallographic data and structure refinement parameters of LLS single crystal	104
4.2	Atomic coordinates ($\times 10^4$) and equivalent isotropic displacement parameters ($\text{\AA}^2 \times 10^3$) for LLS	105
4.3	Structural geometry parameters of LLS along the XRD results	107
4.4	Computed vibrational wavenumbers, measured FT-IR and FT-Raman band positions (cm^{-1}) and assignments for LLS	111
4.5	Second-order perturbation theory analysis of Fock matrix in NBO basis	123
4.6	Calculated absorption wavelengths, energies and oscillator strengths of LLS using DFT-B3LYP/6-311++G(d,p) level of basis set	127
5.1	Structural parameters of ZSD along with the corresponding experimental data	136
5.2	Experimental and calculated B3LYP level vibrational wavenumbers (cm^{-1}) with potential energy analysis.	141
5.3	Second-order perturbation theory analysis of Fock matrix in NBO analysis	143
5.4	Calculated absorption wavelengths, energies and oscillator strengths of ZSD using DFT-B3LYP/6-311++G(d,p) level of basis set	151
6.1	Optimized structural parameters of the TONP	160
6.2	The calculated and observed vibrational wavenumbers (cm^{-1}), IR intensity, Raman intensity and vibrational assignments of the TONP	163
6.3	The calculated and observed UV-Vis spectral parameters for	170

TONP with its assignments

6.4	Second order perturbation theory analysis of Fock matrix of TONP by NBO method	175
7.1	Optimized structural parameters of the PDNB	188
7.2	The calculated and observed vibrational wavenumbers (cm^{-1}), IR intensity, Raman intensity and vibrational assignments of the PDNB	190
7.3	The calculated and observed UV-Vis spectral parameters for PDNB along with its assignments	196
7.4	Second order perturbation theory analysis of Fock matrix of PDNB by NBO method	203
8.1	Optimized structural parameters of the ZNB	216
8.2	Vibrational assignments of ZNB based on potential energy distribution analysis	220
8.3	Selective donor-acceptor interactions of ZNB	229
