ACKNOWLEDGEMENT

The author wishes to extend her deep sense of gratitude to Dr. K.P Jaya, Assistant professor, Structural Engineering Division, Anna University, for her expert guidance throughout the course of the work. She has been a constant source of insight, inspiration, and encouragement.

The author extends her heartfelt thanks to Dr. A. Meher Prasad and Dr. K. Muthumani, Doctoral committee members, for sharing their valuable suggestions and invoking to explore the subject in depth. The author thanks Dr. M. Sekar, Dean, Anna University, Dr. V. Shanmugasundaram, Head, Department of Civil Engineering, Dr. P. Devadoss Manoharan, Head, Structural Engineering Division and Dr. G. M. Samuel Knight, Professor, Structural Engineering Division for their guidance and support.

Sincere thanks are due to Dr. N. Lakshmanan, Director, SERC for permitting to perform the experimental investigation at AStar Laboratory, SERC and Dr. K. Muthumani and Mr. Gopalakrishnan, SERC for supporting in carrying out the experiment. The author is grateful to Mr. V. Udhayakumar and Mr. S. Shanmugasundaram for their contribution to the work. Special thanks are due to all friends and faculty members of Structural Engineering Division for the help and support extended by them through out the course of work. All the effort to carry out the research may not have turned fruitful without the love, encouragement and patient support of my dear family members. The author expresses heartfelt thanks for their invaluable support.

Every good gift and every perfect gift is from above, and cometh down from the Father of lights, with whom is no variableness, neither shadow of turning. James: 1:17. The work would not been successfully completed without the grace and guidance of the Lord. All Glory and Honour to Him.

G. HEMALATHA
