

ACKNOWLEDGEMENTS

Man is the highest creation of “GOD” who provides strong mental support, so first of all I wish to express my deep sense of gratitude and thanks to “GOD”.

I would like to express my great appreciation and gratitude to my supervisor and mentor, **Prof. B. C. Das**, Dr. B. R. Ambedkar Center for Biomedical Research University of Delhi (North Campus), Delhi, who taught me like a teacher, inspired me like a friend and in numerous ways tolerated me like a parent. His constant motivation, concrete suggestions and deep involvement throughout the course of the present study were as exemplary as the complete independence he gave me for doing things in my own way. He came forward as an unwavering and strong support during the adverse moments and took the best care with great generosity. Each passing day, during the Ph.D tenure strengthened my belief that with no person, except him, could I have completed my work. I consider myself fortunate to work with such an enthusiastic and kind hearted person like him.

I would like to begin by thanking my Co-supervisor, **Dr. Suresh Hedau**, Scientist C, ICPO (ICMR) for his never-failing patience, optimism, and advocacy. Thank you for creating a learning environment that provides supportive guidance whenever needed but also the independence to help me develop my skills as a scientist.
