

LIST OF GRAPHS

Graph No.	Title	Page No.
4.1	Age distribution in urolithiasis patients	89
4.2	Incidence of urolithiasis in females and males (ratio 1:2.52)	90
4.3	Bar diagram showing haemoglobin in gm% in pre and post treatment cases with shilajit	92
4.4	Bar diagram showing comparative RBC catalase activity in human volunteers	94
4.5	Bar diagram showing comparative malondialdehyde levels in nmoles per ml plasma in human volunteers	98
4.6	Bar diagram showing comparative superoxide dismutase levels in $\mu\text{mol/L}$ RBC lysate in human volunteers	100
4.7	Bar diagram showing comparative glutathione peroxidase levels in $\mu\text{mol/ml}$ RBC lysate in human volunteers	102
4.8	Plasma levels of oxalate ($\mu\text{mol/L}$) in Shilajit treated and untreated human subjects of urolithiasis	119
4.9	Urinary oxalate (mg/24hrs) in treated and untreated human subjects of urolithiasis	119
4.10	Urinary oxalate (mg/24hrs) in Shilajit treated and untreated experimental rats	121
4.11-4.16	Graph showing the spectrum of the kidney stone analysis with image and spectra	125-130
