ACKNOWLEDGEMENTS

This thesis and the work presented in it is a representative of the inputs and support of some brilliant scientists and marvelous human beings. The effort, help and encouragement these individuals have provided me during the course of work is beyond comprehension and scope of the acknowledgement written here. This acknowledgement is in no way a measure of my gratitude towards all of them.

My interaction with my supervisor Professor C.R. Babu started when I was undertaking my master’s programme in Environmental Biology. His energy and integrated understanding of various fields of science, let alone botany, encouraged me to undertake doctoral research. And there could not have been a better guide that Professor Babu himself. It was not long before I realized that he was a hard taskmaster, but equally soon his compassionate and considerate nature highlighted his magnificent personality. It was an honour to get an opportunity to work under his supervision. This thesis definitely would not have seen the light of the day had it not undergone the scrutiny of Professor Babu. I am indebted to him for the long hours of work that he has put in for checking this thesis, even after his pressing schedule, just to help me out of a difficult situation. Thank you Sir!

I thank my co-supervisor Dr. A.J. Urfi. His capable guidance, patient advices and remarkable corrections, actually shaped the researcher in me. I thank him for all the support and guidance extended by him.

I thank Professor T.R.Rao, Professor Mihir Deb (ex-Directors of the School of Environmental Studies), Professor M.K. Pandit (Head of Department of Environmental Studies) and Professor Inderjit (Acting Head of Department of Environmental Studies and Director of Centre for Environmental Management of Degraded Ecosystems), for providing me facilities to work. I am especially thankful to Professor Inderjit who has been a source of constant encouragement and support. I am also thankful to Professor T.R. Rao and Professor S.R. Yadav
for being members of my advisory committee and for their concern and critical inputs.

I thank the State Forest Department of Rajasthan for the support extended to me during the field work. I would like to thank Mr. R. G. Soni and Mr. Abhijit Ghose (Former, Principal Chief Conservator of Forests, Government of Rajasthan) for the permission and logistic support provided to under the studies. Support extended by Mr Y.K. Sahoo, Mr Akshay Singh and Mr Manoj Parashar (DCF, Nahargarh Biological Park) is also duly acknowledged.

I would like to thank Professor H.Y. Mohan Ram for his encouragement and concern for the thesis. I was lucky enough to get an opportunity to interact with him and learn some interesting facets about plant life.

Thanks are due to Mr V.G. Gogate for the help, support and concern shown by him throughout the duration of the thesis. He has always been very encouraging and supportive. Thank you so much Sir for everything.

My stay at Lab# 26 B and the Centre was made most comfortable due to presence of some fantastic individuals. Without their help and motivating company, it would not have been possible to persist for so long and get the strength to continue further still.

Help and advice of my seniors Drs Suman Lakhanpaul, Sudeshna Mazumdar, Radhey Shyam Sharma, Arindam Bhattacharya, David Kothamas, Rajiv Janardhanan, Vijay Kumar, Shruti Rai, Vandana Mishra, Somdutta Sinha Roy and Shvetank Sharma is gratefully acknowledged. Their constant support and readiness to address any problem made life so much simple during the research days.

The help, support and encouragement provided by my seniors Drs Amit Love and Suresh Babu is enormous. They have always been around to help out in any issue and support me throughout. Thank you both of you!
The help provided by Dr Rakesh Dahiya in the final stages of editing and correcting the thesis is immense and is gratefully acknowledged. A special word of mention for my junior Pallavi, for the help provided during the finalization of the thesis.

Many thanks to Drs Faiyaz Khudsar, Shah Hussain and Ayesha Sultana for the encouragement and support provided during the research days.

I thank the technical staff of 26B and the Centre for always being around to help. A special word of thanks for Tarlokji and Kishoriji for accompanying me to the field. Thanks are also due to Shiv Shankarji, Arun, Nagendar, Dara, Lokesh and Neeraj for running around for various jobs. Heartfelt thanks to Pankaj for providing help all the time when I needed it.

I thank Totaramji for binding of the thesis and Joshi for helping in procuring field equipment at very short notice.

I take this opportunity to thank Dr. K. M. Jayahari for being there whenever I needed help and for constantly egging me to finish the thesis. Support provided by him in proof reading the thesis is duly acknowledged.

Thanks are due to Sasi M. for the support in formatting the thesis at a very short notice.

Junior Research Fellowship and Senior Research Fellowship from the University Grants Commission for the period 2002-2007 is gratefully acknowledged.

This research work definitely would not have reached anywhere without the approbation and support of my parents and I thank them for their patience and encouragement because of which I was able to complete the episode of life called ‘Thesis’.
