Acknowledgement

…It is impossible to start….

This thesis arose in part out of years of research study that has been carried out since I joined Nucleic Acids Research Laboratory, at the Chemistry Department, D. U. I met numerous wonderful people during this journey of constant learning and it is a pleasure to convey my gratitude to them all, through this humble “acknowledgment”.

First and foremost, I would like to owe my profoundest gratitude to my supervisor, Prof. Shrikant Kukreti. It cannot be argued with that the most influential person in my research career has been my supervisor. Above all and the most needed, he provided me unflinching encouragement and support in various ways. His truly scientist intuition has made him as a constant oasis of ideas and passions in science, which exceptionally inspire and enrich my growth as a student, a researcher and a scientist want to be. I am indebted to him more than he knows. His passion, guidance, and discipline have been indispensable to my growth as a researcher and as a person, over these past five years. He has been extraordinarily tolerant and supportive. His wide knowledge, constructive criticism, extensive discussions around my work and interesting exploration has been very helpful in my study. His tremendous knowledge and passion for science has always been of great value for me.

I wish to express my warm and sincere thanks to the members of my advisory committee, Dr. Mahendra Nath and Dr. P. Venkatesu, for their insightful comments and suggestions. I would also like to express my heartily gratitude to Prof. Harish Chandra. The discussions with him have been illuminating. He has always given me constructive comments and warm encouragement.

I would like to thanks Prof. S.M.S. Chauhan, Head, Department of Chemistry, University of Delhi, for providing me all the research facility.

I acknowledge the University Science Instrumentation Center (USIC), University of Delhi, for allowing me to conducting Circular Dichroism and Fluorescence experiments at center.
I am delighted to extend my profound appreciation for the tremendous support and cooperation I received from my senior Dr. Mahima Kaushik. Her words can always inspire me and bring me to a higher level of thinking. Her meticulous comments were of enormous help to me. I wish to express my sincere gratitude to my senior Dr. Sarika Saxena, for allowing me to use UV-Tm instrument at Amity University, at the later stage of the experimental work. Her help has been a big contribution, towards completion of my thesis.

A special gratitude to my other seniors, Dr. Aparna Bansal, Dr. Manoj Prasad Thapliyal, Dr. Shikha Kaushik and Dr. Kapil Roy for their constant support throughout my research work. I would love to mention special thanks to my senior Dr. Shikha Kaushik who squeezed time from her busy schedule to help me out in last minute editing. I could not have ended it without her kind assistance, affection and encouragement. Writing thesis is a long and lonely marathon, thanks to my labmate and friend Savita Joshi for giving me hearty support at the low times. The odd times coffee and Maggie sessions will be remembered. I would also like to thank my labmates Swati Mahendru, Mohan Kumar, Priyanka Thakral, Swati Chaudhary, Saami Ahmed and Vartika Tomer for all their help and support for during completion of my thesis work.

My special appreciation goes to Dr. Sunil Kumar for all the constant support, help, unfailing cooperation and friendship. Thanks for always standing beside me. My special appreciation is done to Dr. Rajesh Kumar, Dr. Mukesh Kumar, Dr. Ishraque Ahmad, Dr. Neeraj Mishra, Jitendra Maurya, Awnish, Sandeep Kataria and Govind Daspa for the good and friendly times. Heartfelt thanks to my friends Poonam Pandey, Ragini Tomer, Ambreen Bashir, Priyanka Mishra, Sheba S. Ramsay, Dr. Gauri Mishra, Dr.Vandana Kukshal and Smriti Sharma for their love and care. I wish to convey special thanks to Mahesh Samant (Dept. of Biophysics, University of Mumbai) for scientific discussions and support.

I thank Mr. Baldev Singh, Amit and Saroj (Department of Chemistry) for their help and cooperation concerning administrative work.
Finally I would like to thank my life partner Amlesh for his endless love, kindness and untiring support. He has a constant source of motivation for me. Thank a lot for being with me in all the ups and downs of life. I owe my huge and loving thanks to my little angel Ishi for her selfless love and innocence. A few lines are too short to make a complete account of my deep appreciation for my loving parents, Sister Renu Singh and my brother-in-law H. B. Singh. I also owe my huge and loving thanks to my nephew Divyansh.

Lastly, I would like to thank to Almighty for bestowing upon me the courage to face the complexities of life and and fulfil my dreams successfully.

(Anju singh)
