First of all I would like to express my deepest gratitude to GOD, who provided me the opportunity to do this course and enabled me to thanks the people who have supported me in this work.

A research work needs a well defined purposes, constant focus and determination, compromise and positive feedback from people.

I would like to take this opportunity to express my sincere thanks and gratitude to my supervisor Professor Monika Datta who has been very influential in ensuring my academic and professional well being ever since I joined the PhD program. She is a great mentor. Her constant guidance, cooperation, and advice played a vital part for the completion of my assigned research work. Her feedback was a wonderful way to implement new ideas and overcome the problems found in the path of my research. The blessing and support given by her shall carry me a long way in the journey of life on which I am about to embark.

I extend my sincere thanks to Professor S.M.S Chauhan, Head, Department of Chemistry, and University of Delhi for providing the infrastructure and departmental facilities to fulfil the research objectives.

I extend my thanks to Professor Gurmeet Singh and Professor D.S. Rawat for accepting to be the part of my advisory committee and for sharing their experience and knowledge. Along the same lines, all committee members were very helpful every time I required their advice.

It gives me immense pleasure to express my sincere thanks to UGC for providing me the financial support in the form of RGNF fellowship to do my research and complete this work.

The characterization of all the new materials was a crucial part of my research and thesis. I would like to acknowledge the Director, AIRF, JNU, Delhi and USIC, University of Delhi, Delhi for their help in providing all the characterization facilities.

I am very thankful to Dr. P. K. Rai and Dr. Amit Saxena in DRDO, Delhi for providing SEM analysis for some of my samples.

The access of UV-Visible spectrophotometer, whenever I needed it, was possible through Dr. Sunil Kumar and Mr. Jitendra Maurya. I am delighted to thank Mr. Rahul Bhardwaj, and Dr. Ruchita Pal for their help and advice in using the electron microscope. Their constant attention to finding a way to get better pictures of the nanocomposites and advice was very helpful.

I would also like to thank Mr. Manish, Mr. Akash and Mr Rahul for providing me a fruitful XRD data.

I extend my gratitude thanks to all the technical and laboratory staff including Mr. Ravinder Singh, Mr. Govind Dassapa, Mr. Amarjeet, Mr. Girish, Mr. Anil, Mr. Ram...
Prasad, Late. Mr. Rajesh Pathania and many other who have given their time and resources to complete this work.

For the successful fulfilment of all the administrative work related to this course I would like to thank Mr. Baldev Rana, Mr. Amit Kumar and Mr. Surendra Singh.

I would like to thank my senior Mr. Rahul Singhal for his specific contributions and help during the initial start up period of my research project and for introducing me to the world of nanocomposites.

I extend my thanks to all my lab colleagues Dr. Reshu Goyal, Dr. P. Lokeswari, Dr. Hema Kundra, Dr. Pratibha Pandey, Dr. Chetna Dhand, Ms. Manpreet Kaur, Mr. Chandra Mohan, Mrs. Ansa Anjum, Mrs. Harsha Mangal, Mr. Raj Kumar, Mrs. Shilpa Jain, Mr. Arunkant, Mrs. Priyanka and Mrs Neeraj for their help and support throughout my Ph.D. work.

I express my special thanks to Mrs Anamika Debnath, Mr. Panmei Gaijon and Dr. Uzma Nadeem, for their friendly and helpful contributions during my studies. I am very grateful to the peaceful, stimulating, cooperating, and friendly atmosphere provided by them to complete and succeed in my work. The long hours required in the information search, nanocomposites synthesis, characterization, and writing were always easier with their encouragement, cooperation and comments.

A special appreciation goes to Ms. Alokita Datta for her valuable suggestions regarding the completion of my research and thesis.

I wish to express my profound gratitude to my family for their constant inspiration, love and support. Bade Papa, Bhaiya, Bhabhi, Bahan Ji and Jiia ji always provide me strength and moral support which had helped me in shape my dissertation till the point of completion. A little time spent with Navina, Vicky, Arjun, Muskan, Aman, Dishant and Megha always act as immediate release of happiness and energy during the time of stress and tension. The unforgettable memories and blessings of Badi Mummy has always been a silver lining in the dark clouds of my life and inspired me to do well in my field.

Finally, I have no words to express my deep sense of gratitude and love to my papa, Shri Kanhaya Lal and mummy Smt. Revti Devi whose unquestionable belief in me, has been a constant source of encouragement and helped me to achieve my goals. I am extremely thankful, blessed and proud of my Mummy-Papa, and would like to dedicate this work to them. Thank you for always being there and believing in me, especially during the hard times in my life.

Last but not least I would like thank all those who were involved in my research, in a direct or indirect way enabled me to obtain quality data needed for my thesis research and provided constant support to present this work in the thesis form.

Seema
