5.7  Graph showing reliability value of capacitor with time in induction motor after 73

5.8  Graph showing reliability value of connection with time in induction motor after modifications 74

5.9  Graph showing the reliability value of belt pulley with time in induction motor after modifications 74

5.10 Graph showing the reliability value of induction motor after modification 75

5.11 System Dynamic modeling of the compressor 80

5.12 Graph showing the reliability of suction/Discharge valve with time in the compressor 82

5.13 Graph showing the reliability of the piston ring of the compressor with time 83

5.14 Graph showing the reliability of connecting rod of the compressor with time 83

5.15 Graph showing the reliability of the compressor with time 84

5.16 System Dynamic modeling of compressor [M] 87

5.17 Graph showing the reliability of the suction or discharge valve after modifications 89

5.18 Graph showing the reliability of connecting rod after modifications 90

5.19 Graph showing the reliability of piston ring after modifications 91

5.20 Graph showing the reliability of compressor [M] after modifications 91

6.1  System Dynamic modeling of the condenser 96

6.2  Graph showing reliability regarding choking/Blockage in Condenser coils with time 98
6.3 Graph showing reliability regarding leakage in condenser coils with time

6.4 Graph showing the reliability value of the condenser

6.5 System Dynamic modeling of condenser [M]

6.6 Graph showing reliability regarding choking/Blockage in condenser coils with time after

6.7 Graph showing reliability regarding leakage in condenser coils with time after modification

6.8 Graph showing the reliability value of the condenser [M]

7.1 System Dynamic modeling of Filter / Drier and Capillary Tube

7.2 Graph for the reliability of filter/drier with respect to time

7.3 Graph for reliability regarding leakage in the capillary tube

7.4 Graph for reliability regarding blockage in a capillary tube with time

7.5 Graph for the reliability of expansion device (capillary tube) with respect to time

7.6 System Dynamic modeling of Expansion devices [M]

7.7 Graph for the reliability of filter/drier [M] with respect to time

7.8 Graph for reliability regarding leakage in the capillary tube [M] with respect to time

7.9 Graph for reliability regarding blockage in the capillary tube [M] with respect to time

7.10 Graph for the reliability of Expansion Device (Capillary Tube)[M] with respect to time
8.1 Showing comparative reliability enhancement graphs for CEC and CEC [M] 126
8.2 Showing comparative reliability enhancement graphs for LOR and LOR [M] 128
8.3 Showing comparative reliability enhancement graphs for ROE and ROE [M] 129
8.4 Showing comparative reliability enhancement graphs for ROCAP and ROCAP [M] 130
8.5 Showing comparative reliability enhancement graphs for ROCN and ROCN [M] 132
8.6 Showing comparative reliability enhancement graphs for ROTM and ROTM [M] 134
8.7 Showing reliability enhancement of ROINDMOT [M] as compared to ROINDMOT with time 136
8.8 Showing reliability enhancement of ROSDVL [M] as compared to ROSDVL with time 137
8.9 Showing reliability enhancement of ROCNND [M] as compared to ROCNND with time 139
8.10 Showing reliability enhancement of ROPNR [M] as compared to ROPNR with time 141
8.11 Showing reliability enhancement of COMPRESSOR [M] as compared to COMPRESSOR with time 143
8.12 Showing reliability enhancement of ROCBCC [M] as compared to ROCBCC with time 145
8.13  Showing reliability enhancement of ROLOCC [M] as compared to
ROLOCC with time  147
8.14  Showing reliability enhancement of ROCOND [M] as compared to
ROCOND with time  149
8.15  Showing reliability enhancement of ROFD [M] as compared to
ROFD with time  150
8.16  Showing reliability enhancement of ROLCT [M] as compared to
ROLCT with time  151
8.17  Showing reliability enhancement of ROBCT [M] as compared to
ROBCT with time  153
8.18  Showing reliability enhancement of ROEXPDEV [M] as compared to
ROEXPDEV with time  155
9.1   Showing the reliability degradation rate for Refrigerator and
Refrigerator [M]  160
