| <b><i>CHAPTER 2</i></b>  |                     |
| <b><i>Methodology</i></b>  | <b><i>17-31</i></b> |
| 2.1 Density Functional Theory  | 17                  |
| 2.1.1 Born Oppenheimer approximation   | 17                  |
| 2.1.2 Hohenberg-Kohn Theorems  | 17                  |
| 2.1.3 Kohn Sham scheme   | 19                  |
| 2.2 Exchange-correlation functional  | 20                  |
| 2.2.1 Local density approximation  | 21                  |
| 2.2.2 Generalized gradient approximation   | 21                  |
| 2.3 Wien2k   | 25                  |
| 2.4 TBLMTO   | 27                  |
| 2.5 ELK  | 28                  |
| <b>References</b>  | <b>30</b>           |
| <br>   |                     |
| <b><i>CHAPTER 3</i></b>  |                     |
| <b><i>Estimation of Lattice Constant and Bulk Modulus of Materials:<br/>III-V (III-N, III-P), II-VI (BeX, MgX, CdX: X= O, S, Se, Te)</i></b> | <b><i>32-44</i></b> |

|                            |           |
|----------------------------|-----------|
| 3.1 Introduction           | 32        |
| 3.2 Computational details  | 33        |
| 3.3 Results and discussion | 33        |
| 3.4 Conclusions            | 42        |
| <b>References</b>          | <b>43</b> |

#### **CHAPTER 4**

##### ***Predicting Band Gap and Density of States of Materials:***

##### ***III-V (III-N, III-P), II-VI (BeX, MgX, CdX: X= O, S, Se, Te)*** **45-82**

|                             |            |
|-----------------------------|------------|
| 4.1 Introduction            | 45         |
| 4.2 Method                  | 46         |
| 4.3 Results and discussion  | 48         |
| 4.3.1 Group III-N           | 48         |
| 4.3.2 Group III-P           | 58         |
| 4.3.3 BeX( X= O, S, Se, Te) | 64         |
| 4.3.4 MgX(X=O, S, Se, Te)   | 74         |
| 4.3.5 CdX(X=O, S, Se, Te)   | 74         |
| 4.4 Conclusions             | 80         |
| <b>References</b>           | <b>116</b> |

#### **CHAPTER 5**

##### ***Optical Properties of Materials:***

##### ***III-V (III-N, III-P), II-VI (BeX, MgX, CdX: X= O, S, Se, Te)*** **83-136**

|                            |            |
|----------------------------|------------|
| 5.1 Introduction           | 83         |
| 5.2 Method                 | 84         |
| 5.3 Results and discussion | 85         |
| 5.4 Conclusions            | 135        |
| <b>References</b>          | <b>136</b> |

#### **CHAPTER 6**

##### ***Conclusions and Future Perspectives***

|                         |     |
|-------------------------|-----|
| 6.1 Conclusions         | 137 |
| 6.2 Future Perspectives | 138 |
