Table 3.8 Profile of the male youth under study by PTG…………………… 92
Table 3.9 Occupational status and recent work related migration of youth by PTG………………………………………………………… 93
Table 3.10 Frequency of exposure of youth to mass media and urban life by PTG………………………………………………………… 95
Table 3.11 Friend circle of youth and Male Female Interaction Index (MFII) by PTG………………………………………………………… 96
Table 3.12 Village surrounding for couples by PTG………………………… 97
Table 4.1 Details of knowledge received by youth on sex for the very first time by PTG………………………………………………………………………………… 101
Table 4.2 Knowledge of youth on nightfall/swapna dash by PTG................................. 103
Table 4.3 Knowledge of youth on masturbation by PTG……………………………………… 104
Table 4.4 Background characteristics of those youth who have knowledge on masturbation by PTG………………………………………………………………… 105
Table 4.5 Details of knowledge received by youth on masturbation and provider’s detail by PTG………………………………………………………………………………… 108
Table 4.6 Knowledge of youth on sexually transmitted infections/diseases (STIs/STDs) by PTG………………………………………………………………………………… 110
Table 4.7 Knowledge of youth on causes of sexually transmitted diseases by PTG…………………………………………………………………………………………… 112
Table 4.8 Knowledge of youth on precautions against sexually transmitted diseases by PTG………………………………………………………………………………………… 113
Table 4.9 Youth having correct knowledge on sexually transmitted disease by background characteristics and PTG……………………………………………………………… 116
Table 4.10 Knowledge of youth on HIV/AIDS by PTG………………………………………… 120
Table 4.11 Youth having correct knowledge on HIV/AIDS by background characteristics and PTG………………………………………………………………………………………… 123

Table 5.1 Details of first marriage of married youth by PTG……………………………………… 128
Table 5.2 Details of cohabitation with wife and first sexual experience of married youth within marriage by PTG………………………………………………………………………………… 129
Table 5.3 Details of relationship of married youth with wife before marriage by PTG…………………………………………………………………………………………… 132
Table 5.4 Description of sexual life of married youth by PTG……………………………………… 133
Table 5.5 Married youth who had pre-marital sex by background characteristics and PTG…………………………………………………………………………………………… 135
Table 5.6 Details of the first pre-marital sexual partner of married youth by PTG…………………………………………………………………………………………… 137
Table 5.7 Details of the first sexual intercourse performed by married youth with their first sexual partner by PTG………………………………………………………………………………… 139
Table 5.8 Reaction of the community over the first pre-marital sexual relationship of the married youth by PTG…………………………………………………………………………………………… 140
Table 5.9 Married youth who had extra-marital sex by background characteristics and PTG…………………………………………………………………………………………… 143
Table 5.10 Details of the extra-marital sexual partner of married youth by PTG…………………………………………………………………………………………… 144
| Table 5.11 | Details of the last sex performed by married youth with their last sexual partner by PTG. | 146 |
| Table 5.12 | Reaction of the community over the last extra-marital sexual relationship of the married youth by PTG. | 147 |
| Table 5.13 | Unmarried youth who ever had physical contact with females and future intention by PTG. | 148 |
| Table 5.14 | Details of physical contacts and sexual acts performed by unmarried youth by PTG. | 150 |
| Table 5.15 | Unmarried youth who ever had physical contact with any female by background characteristics and PTG. | 153 |
| Table 5.16 | Details of the partner with whom the unmarried youth had the first physical contact by PTG. | 154 |
| Table 5.17 | Age at first sexual intercourse of unmarried youth and partners detail by sequence and PTG. | 157 |
| Table 5.18 | Details of the sexual intercourse of unmarried youth by partners sequence and PTG. | 159 |
| Table 5.19 | Reaction of the community over the sexual intercourse of unmarried youth by partners sequence and PTG. | 160 |
| Table 5.20 | Youth who stayed outside home for more than one month at a time by marital status, sexual life and PTG. | 167 |
| Table 6.1 | Youth who ever had experienced any symptoms of sexually transmitted disease by PTG. | 172 |
| Table 6.2 | Youth who ever had experienced any of the symptoms of sexually transmitted disease by background characteristics and PTG. | 174 |
| Table 6.3 | Married youths who had ever experienced any of the symptoms of sexually transmitted disease by sexual life and PTG. | 177 |
| Table 6.4 | Unmarried youths who had ever experienced any of the symptoms of sexually transmitted disease by their sexual life and PTG. | 178 |
| Table 6.5 | Youth who had experienced the symptoms of sexually transmitted disease more than once by type of symptom and PTG. | 180 |
| Table 6.6 | Youth who ever had experienced any non-STD symptoms by PTG. | 184 |
| Table 6.7 | Youth who had experienced the non-STD symptoms more than once by type of symptom and PTG. | 185 |
| Table 6.8 | Youth who had experienced any of the symptoms of sexually transmitted disease during the reference period by PTG. | 187 |
| Table 6.9 | Youth who had experienced any of the symptoms of sexually transmitted disease during the reference period by background characteristics and PTG. | 189 |
Table 6.10 Married youth who had experienced any of the symptoms of sexually transmitted disease during the reference period by their sexual life and PTG.  
Table 6.11 Unmarried youth who had experienced any of the symptoms of sexually transmitted disease during the reference period by their sexual life and PTG.  
Table 6.12 Rating of severity of different symptoms of sexually transmitted diseases which were experienced by the Juang youth during the reference period.  
Table 6.13 Rating of severity of different symptoms of sexually transmitted diseases which were experienced by the Lodha youth during the reference period.  
Table 6.14 Youth who had experienced the non-STD symptoms during the reference period by PTG.  
Table 6.15 Rating of severity of different non-STD symptoms which were experienced by the Juang youth during the reference period.  
Table 6.16 Rating of severity of different non-STD symptoms which were experienced by the Lodha youth during the reference period.  
Table 6.17 Current status of the symptom of the sexually transmitted disease, for those youth who had the symptom during the reference period by PTG.  
Table 6.18 After effect of the symptom of sexually transmitted disease which was ever developed among the married youth by PTG.  
Table 6.19 After effect of the symptom of sexually transmitted disease which was ever developed among the unmarried youth by PTG.  

Table 7.1 Reasons for having faith on modern health care system by PTG.  
Table 7.2 Reasons for having faith on traditional health care system by PTG.  
Table 7.3 Faith on traditional health care practitioners of other communities by PTG.  
Table 7.4 Reasons for preferring traditional healer for treatment of common ailments by PTG.  
Table 7.5 Reasons for preferring traditional healer for treatment of problems related to sex and sexual organ by PTG.  
Table 7.6 Percent youth who had experienced any of the symptoms of sexually transmitted disease and taken treatment during the reference period by PTG.  
Table 7.7 Treatment seeking behaviour of youth for the symptom of burning sensation/pain during urination by PTG.  
Table 7.8 Treatment seeking behaviour of youth for the symptom of white/yellowish discharge from penis by PTG.
Table 7.9   Treatment seeking behaviour of youth for the symptom of sores on
the penis by PTG…………………………………………………... 226
Table 7.10  Treatment seeking behaviour of youth for the symptom of nodules
(pimples) on genital organ by PTG………………………………... 227
Table 7.11  Treatment seeking behaviour of youth for the symptom of ulcer in
genital organ by PTG……………………………………………… 228
Table 7.12  Treatment seeking behaviour of youth for the symptom of
swelling of genital organ by PTG…………………………………. 230
Table 7.13  Treatment seeking behaviour of youth for the symptom of pus
discharge from genital organ by PTG……………………………. 231
Table 7.14  Treatment seeking behaviour of youth for the symptom of blood
discharge from the penis by PTG………………………………… 232
Table 7.15  Treatment seeking behaviour of youth for the symptom of pain
during sexual intercourse by PTG………………………………… 233
Table 7.16  Youth who had taken treatment from both modern as well as
traditional health care systems for any of the STD symptoms
experienced during the reference period by background
characteristics and PTG…………………………………………… 236
Table 7.17  Youth who had taken treatment from modern health care systems
for any of the STD symptoms experienced during the reference
period by village infrastructure and PTG…………………………  238
Table 7.18  Percent youth who had experienced any of the non-STD
symptoms and taken treatment during the reference period by
PTG………………………………………………………………... 239
Table 7.19  Treatment seeking behaviour of the Juang youth for the non-STD
symptoms, experienced during the reference period………………  240
Table 7.20  Treatment seeking behaviour of the Lodha youth for the non-STD
symptoms, experienced during the reference period………………  241
