ACKNOWLEDGEMENT

Completing a thesis is a challenge and thanking all those who contributed to it is an even greater one because words are not enough to express the gratitude. Though only my name appears on the cover of this thesis, many people have contributed to its production in one or the other way. Today, when I am close to achieving an important milestone in my life, I would like to thank all of them, including those whom I may have forgotten to mention.

I express my earnest gratitude to my research mentor Dr. Sanjay S. Toshniwal for his valuable guidance, constant encouragement and critical appreciation during the entire research period. I am deeply indebted to him for offering independence to work, which is rare to achieve. Sir, your invaluable suggestions and advice have paved the way to finish this project successfully.

This project bears imprints of my PhD. Committee members, I would like to thank the committee members for their guidance and encouragement in carrying out this project work.

I also thank Dr Anil Middha, Department of Pharmaceutical Science, JJT University, for kind support, advice and guidance.

I owe my deepest gratitude to my beloved seniors Manish, D S Ravi, Manoj, Renu, Zullu, and for their timely advice and supportive attitude at all the times. It is also my pleasure to thank my freinds, Sohrab, Pratima, Neeru, Sanchita, Priyanka, Surya, Vaishali, Tracy, Sabbir and Sneha for their active cooperation and making a joyous lab environment. A special thanks to Zullu, Renu, Sonal, Jaipreet and Ruchira for being there with me in all ups and downs of PhD life……… thank you very much guys.

I am also thankful to Devraj, Sujata, Sandeep, Sreenath, Rahul for their support and help.
It will be worthless if I don’t thank Dr. I. P Singh and Dr. K. K. Bhutani of NIPER, Mohali, India who encouraged and supported me during my PhD work. I express my sincere thanks to Hardik, Siddh, Nafees and Keyur of NIPER, Mohali for their advice and help in understanding chemistry of molecules.

I wish to avail this opportunity to express my deep sense of gratitude and love to my friends for their support, strength, help and for everything without which I wouldn’t have been able to finish this difficult task.

I would like to thank Dr Debashish Mitra, National Centre for Cell Science, Pune for his unconditional support and help.

I would like to thank the funding agencies Department of Biotechnology, India and Tata Memorial Trust, India for providing financial support to complete the research work.

I am Thankful to all the staff members of JJT University, Rajasthan, India and Vidarbha Institute of Pharmacy, Maharashtra, India

One thing that is beyond doubt is that my thesis would have taken at least five more years without my family. However, the two persons that have been crucial in the whole undertaking have been my better half Manjiri who supported me right from the beginning, helped me to overcome every difficult situation and my little bundle of Joy, my kid Neil who always kept me happy and smiling.

I wish to avail this opportunity to express my deep sense of gratitude and love to my parents, in-laws, brothers and sisters, and my close friends Dr. Jawahar and Geetha Kodam for their support, strength, help and for everything without which I wouldn’t have been able to finish this difficult task.

Thank you everyone who has directly or indirectly helped me during this journey!
