ACKNOWLEDGEMENT

The author express his deepest gratitude and sincere thanks to Dr. S. Kandasamy, Dean, Anna University Tiruchirappalli, Ariyalur Campus, Ariyalur, for his valuable guidance, suggestions, constant support and encouragement throughout the period of this research work.

The author wishes to record his heartfelt thanks to the Doctoral Committee members Dr. P. Devadas Manoharan, Professor and Head of Structural Engineering Division, Anna University and Dr. M. Neelamegam, Deputy Director, SERC, Taramani, for their expert comments and suggestions during Doctoral Committee meetings.

The authors thanks Prof. S.R. Damodarasamy, Principal and Dr. P. Perumal, Head of Department of Civil Engineering, Government College of Engineering, Salem, for permitting him to use the Laboratory facilities. The author thanks VLB Janakiammal College of Engineering management for providing the platform to continue the research work. The author also thanks Dr. S.C. Natesan, Dean, VLBJCET, for his valuable suggestions.

The author thanks all the teaching, non teaching, post graduate students of Department of Civil Engineering for their help. The author is extremely thankful for the encouragement and co-operation given by friends, wife C. Lalitha Devi, son P. Mohanasundaram, and his parents and without them this work would not have been possible.
