ACKNOWLEDGEMENT

The author wishes to express his profound gratitude and sincere thanks to Dr. M. Kaarmegam, Former Director, Centre for Water Resources (CWR) and Syndicate Member, Anna University Chennai (AUC), for his valuable guidance and constant source of inspiration for this work. The author is grateful to Dr. Usha Natesan, Professor, CES, AUC, Dr. G. James Pitchai, Professor and Head, Soils and Environment Division, AC&RI, Madurai and Dr. S. Raja Mohan, Research Coordinator and Assistant Professor, TCE Madurai for their expert comments given during periodic doctoral committee meetings.

The author expresses his sincere thanks to Dr. K. Karunakaran, Director, CWR, AU, for his encouragement. The author wishes to thank the Staff and friends of CWR for their moral support.

The author is thankful to the TCE Management and the Principal, Dr. V. Abhai Kumar, who has shown keen interest and care in completing this thesis. Dr. K. Arunachalam, Professor and Head, colleagues and students of TCE are all thanked for their timely support. Indian National Academy of Engineers (INAE) provided a fellowship at IITM, Chennai, which is gratefully acknowledged.

The author owes his gratitude for the blessings of his parents, which make his personal as well as professional life very fruitful. The author appreciated the sacrifices made by his daughter Abirami and his wife Dr. Lakshmi, who also provided the kind of inspiration to complete this study. The author will ever remember the support and cooperation extended to him by his kith and kins, teachers and well wishers by which he is able to be where he is now.
