ACKNOWLEDGEMENT

I sincerely thank Dr. K. Sankaran, my supervisor, for providing me an opportunity to work in the futuristic area of engineering proteins with bacterial lipid modification. His quest for perfection in experimentation achieved through sound fundamentals, proving scientific ideas without shortcuts, made me learn what research really is. I particularly appreciate his deep interest in problem solving, making himself available most of the time in person or telephone for discussion. I am grateful to Dr. V. Murugan for introducing me to Recombinant DNA Techniques and providing constant intellectual input in achieving the goal.

I am thankful to Dr. P. Kaliraj and Dr. Arun Balakrishnan, former Directors and Dr. R. B. Narayanan, present Director for having provided me permission and liberal support for my research. I acknowledge the critical support of Dr. Meenakshi sundaram and Dr. Ramalingam for carrying out bioreactor studies. My special thanks are due to Dr. P. Gautam, who has been providing me moral support and encouragement for career advancement.

I am thankful to my doctoral committee members Dr. A. Surolia, I.I.Sc., Bangalore and Dr. Ch. Mohan Rao, Centre for cellular and molecular biology (CCMB) for their critical suggestions and evaluation at various stages of thesis work.

I take this opportunity to thank Dr. R. Nagaraj, Deputy Director and Dr. M.V. Jagannadham, Scientist, CCMB, Hyderabad for collaborating with us and teaching me Mass spec techniques.

I am thankful to my lab mates, Jeevitha Jeevan, Tamilselvan, Pavankumar, Shruthi Hamsanathan, Alagu Maruthanayagam, and several other
research scholars in CBT for their cooperation and help throughout this period. My thanks are due to Ghousi nisa begum for reagents and media preparations.

I am very thankful to Dr. Madan Babu, NCBI, NIH, USA for his association with me both in the laboratory while he was a student in CBT and through email later giving valuable inputs. Dr. Venkat Gopalan, Associate Professor, The Ohio State University, USA deserves special mention for his keen interest in the progress of my research and career.

I acknowledge my friends, Mr. Siva Prakash, MSSRF, Chennai, Dr. Hari Narayanan, CDFD, Hyderabad, Mr. Sai Subramaniam, CLRI, Chennai, Dr. B. Sasi Sekar, CBT, Chennai, who provided valuable professional assistance whenever I needed.

The administrative staff of CBT and Anna University richly deserve my acknowledgement for their ready support in taking care of official formalities and facilitating my research.

Crucial initial financial assistance provided by LG Foundation, Chennai, Research fellowships provided by Lady Tata Memorial Trust, Mumbai and Council of Scientific and Industrial Research, New Delhi are gratefully acknowledged.

I am indebted to my parents and my brother and his family for their personal sacrifice, unstinted support and constant encouragement for pursuance of my higher studies.

S.KAMALAKKANNAN
